**Notice**

For a fast and smooth installation, use a formatted USB flash drive when performing the installation of upgrade program for KIT 1 on your sewing machine.  
Due to the large size of the upgrade file, if you try to upgrade the machine using a direct computer connection with a USB cable, it could take up to several hours to complete the installation.

**Introduction**

This web site issues the certification key so that KIT I can be used with your sewing machine. Before requesting that a certification key be issued, read the following precautions, and then click the [Next] button.

**⚠ Precautions**

- Update your sewing machine software to latest version.
- In order for a certification key to be issued, a connection to the Internet must be established.
- For certification, the machine number (No.) is required. For details, refer to the enclosed Installation Guide.
