

BABY LOCK SEWING ACCESSORIES

Leather Quilting Roller Foot

(BLSO-LRF)

Use this foot for stitching along small tight curves such as the fingers of gloves. It also is a very useful foot for quilting; achieve a free-motion result with the confidence of having the machine feed the fabric.

MACHINE SETTINGS

| | |
|----------------|-----------------|
| Stitch type: | Straight Stitch |
| Stitch width: | 0 - 7mm |
| Stitch length: | 1.0 - 5.0mm |

Instructions

1. Raise the presser foot and raise the needle to the highest position.
2. Remove the standard presser foot and ankle and attach the Leather Roller foot and tight the screw.
3. You will notice the foot will sit with the wheel touching the left feed dog. This is because the foot is designed to roll with the feed dogs helping you sew in a circular movement.
4. Select a straight stitch.
5. Align the fabric under the foot and start sewing an even speed.
