Descriptions:

Braiding Foot:

Used for both couching and stitching, this braiding foot is adjustable, which allows for greater flexibility in the width of the braid, cord, ribbon, or elastic being applied.

Open Toe Foot:

The open width and clear plastic of this foot make it perfect for projects that require visibility and stability, such as appliqué, surface embellishments, and stitching around intricate areas with decorative stitches. It even has a larger groove on the underside to accommodate thicker stitches and decorative threads.

Descriptions:

Teflon Foot:

Use this non-stick foot to easily feed fabrics that tend to stick to ordinary feet. It is perfect for creating straight and decorative stitches on leather, plastic, vinyl, suede, and other demanding fabrics.

Cording Foot - 5-Hole:

This 5-hole cording foot makes attaching decorative cords and threads a snap. This foot eliminates tangling to ensure that cords lie flat and perfectly parallel to each other. The cording foot controls threads so both hands can guide the fabric. Use this foot to create decorative stitching over cording on single and double layers of fabric.

Fringe Foot:

Create one-of-a-kind decorative surface embellishments that look and feel like chenille-type textures. This is the perfect foot to easily create loops, fringe, and heirloom fagoting. This foot can even be used for making accurate pattern markings.

Pintuck Foot:

Pintucks are a beautiful way to add texture to a classic heirloom or everyday garment. The five grooves on this foot allow for perfect spacing with professional results. This foot allows for precision pintucking when making corded and hollow tucks, as well as parallel and curved forms.
