Quilting Bar and Adapter for Digital Dual Feed

(BLDY-QGDF)

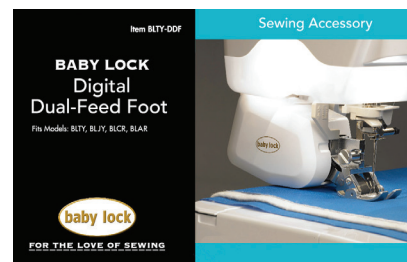

This exclusive Adaptor and Quilting Bar set is perfect for projects that require more precision, such as quilting or garment construction with the use of the Digital Dual Feed Foot. The quilting bar is shaped so that the base guides smoothly over fabrics and sewn seams without snagging to align exact rows of parallel topstitching that are equally spaced.

Instructions

1. Use the small screwdriver from your machine accessories to loosen the two screws on either side of the adaptor.
2. Slide the adaptor onto the top and back of the shank of the Digital Dual Feed Foot. The adaptor should be close to the back white casing of the Digital Dual Feed Foot to allow room for the foot to be attached to the machine in the normal manner.
3. Use the small screwdriver again to tighten the two screws on either side of the adaptor, securing the adaptor to the top of the Digital Dual Feed Foot.
4. Insert the stem of the quilting bar into the opening in the adaptor from the right side of the Digital Dual Feed Foot.
5. Adjust the stem of the quilting bar through the adaptor so that the bar aligns with the seam that has already been sewn.

NOTE: If a Digital Dual Feed Foot (Item #BLTY-DDF) is not included with your machine, contact your Local Authorized Baby Lock Retailer for availability.
