www.babylock.com
INTRODUCTION

Thank you for purchasing this machine. Before using this machine, carefully read the “IMPORTANT SAFETY INSTRUCTIONS”, and then study this manual for the correct operation of the various functions. In addition, after you have finished reading this manual, store it where it can quickly be accessed for future reference.

IMPORTANT SAFETY INSTRUCTIONS

Please read these safety instructions before attempting to use the machine.

DANGER

- To reduce the risk of electrical shock

1 Always unplug the machine from the electrical outlet immediately after using, when cleaning, making any user servicing adjustments mentioned in this manual, or if you are leaving the machine unattended.

WARNING

- To reduce the risk of burns, fire, electrical shock, or injury to persons.

2 Always unplug the machine from the electrical outlet when making any adjustments mentioned in the instruction manual.

• To unplug the machine, switch the machine to the symbol “O” position to turn it off, then grasp the plug and pull it out of the electrical outlet. Do not pull on the cord.
• Plug the machine directly into the electrical outlet. Do not use an extension cord.
• Always unplug your machine if there is a power failure.

3 Electrical Hazards:

• This machine should be connected to an AC power source within the range indicated on the rating label. Do not connect it to a DC power source or converter. If you are not sure what kind of power source you have, contact a qualified electrician.

4 Never operate this machine if it has a damaged cord or plug, if it is not working properly, has been dropped or damaged, or water is spilled on the unit. Return the machine to the nearest authorized Baby Lock retailer for examination, repair, electrical or mechanical adjustment.

• While the machine is stored or in use if you notice anything unusual, such as an odor, heat, discoloration or deformation, stop using the machine immediately and unplug the power cord.
• When transporting the machine, be sure to carry it by its handle. Lifting the machine by any other part may damage the machine or result in the machine falling, which could cause injuries.
• When lifting the machine, be careful not to make any sudden or careless movements, which may cause a personal injury.

5 Always keep your work area clear:

• Never operate the machine with any air openings blocked. Keep ventilation openings of the machine and foot control free from the build up of lint, dust, and loose cloth.
• Do not store objects on the foot controller.
• Never drop or insert foreign objects in any opening.
• Do not operate where aerosol (spray) products are being used or where oxygen is being administered.
• Do not use the machine near a heat source, such as a stove or iron; otherwise, the machine, power cord or garment being sewn may ignite, resulting in fire or an electric shock.
• Do not place this machine on an unstable surface, such as an unsteady or slanted table, otherwise the machine may fall, resulting in injuries.

6 Special care is required when sewing:

• Always pay close attention to the needle. Do not use bent or damaged needles.
• Keep fingers away from all moving parts. Special care is required around the machine needle.
• Switch the machine to the symbol “O” position to turn it off when making any adjustments in the needle area.
• Do not use a damaged or incorrect needle plate, as it could cause the needle to break.
• Do not push or pull the fabric when sewing, and follow careful instruction when free motion stitching so that you do not deflect the needle and cause it to break.
This machine is not a toy:

- Your close attention is necessary when the machine is used by or near children.
- The plastic bag that this machine was supplied in should be kept out of the reach of children or disposed of. Never allow children to play with the bag due to the danger of suffocation.
- Do not use outdoors.

For a longer service life:

- When storing this machine, avoid direct sunlight and high humidity locations. Do not use or store the machine near a space heater, iron, halogen lamp, or other hot objects.
- Use only neutral soaps or detergents to clean the case. Benzene, thinner, and scouring powders can damage the case and machine, and should never be used.
- Always consult the Instruction and Reference Guide when replacing or installing any assemblies, the presser feet, needle or other parts to assure correct installation.

For repair or adjustment:

- If the light unit is damaged, it must be replaced by an authorized Baby Lock retailer.
- In the event a malfunction occurs or adjustment is required, first follow the troubleshooting table in the back of the Instruction and Reference Guide to inspect and adjust the machine yourself. If the problem persists, please consult your local authorized Baby Lock retailer.

Use this machine only for its intended use as described in the manual.

Use accessories recommended by the manufacturer as contained in this manual.

The contents of this manual and specifications of this product are subject to change without notice.

For additional product information and updates, visit our website at www.babylock.com
FOR USERS IN THE UK, EIRE, MALTA AND CYPRUS ONLY

IMPORTANT

• In the event of replacing the plug fuse, use a fuse approved by ASTA to BS 1362, i.e. carrying the mark, rating as marked on plug.
• Always replace the fuse cover. Never use plugs with the fuse cover omitted.
• If the available electrical outlet is not suitable for the plug supplied with this equipment, you should contact your authorized Baby Lock retailer to obtain the correct lead.

Names of Machine Parts

**Main parts**

1. Bobbin winding thread guide and pretension disk (page 15)
2. Thread guide (page 14)
3. Spool cap (page 13)
4. Spool pin (page 13)
5. Hole for extra spool pin
   - This holds an extra spool pin for sewing with twin needle. (page 53) This is not a hole for lubrication. Do not insert oil into this hole.
6. Bobbin winder (page 13)
7. LCD (liquid crystal display) (page 10)
8. Operation panel (page 6)
9. Operation buttons and sewing speed controller (page 6)
10. Flat bed attachment (page 7, 31)
11. Thread cutter (page 19)
12. Needle threader lever (page 19)
13. Thread tension dial (page 29, 68)
14. Handwheel
   - Turn the handwheel toward you (counterclockwise) to raise and lower the needle to sew one stitch.
15. Thread guide cover (page 14)
16. Handle
   - Carry the machine by its handle when transporting.
17. Presser foot lever
   - Raise and lower the presser foot lever to raise and lower the presser foot.
18. Feed dog position switch
   - Use the feed dog position switch to raise and lower the feed dogs. (page 48)
19. Main power switch (page 9)
20. Power supply jack (page 9)
21. Foot controller (page 26)
22. Foot controller jack (page 26)
23. Air vent
   - The air vent allows the air surrounding the motor to circulate. Do not cover the air vent while the machine is being used.
24. USB port (for a USB flash drive) (page 56, 75)
25. Embroidery unit (page 58)

**Needle and presser foot section**

1. Needle bar thread guide (page 18)
2. Needle plate (page 31)
3. Needle plate cover (page 16)
4. Bobbin cover/bobbin case (page 16, 77)
5. Feed dogs
   - The feed dogs feed the fabric in the sewing direction.
6. Presser foot
   - The presser foot applies pressure consistently on the fabric as the sewing takes place. Attach the appropriate presser foot for the selected stitch.
7. Presser foot holder (page 24)
8. Presser foot holder screw (page 24)
9. Buttonhole lever (page 43)
Measurements on the needle plate, bobbin cover (with markings) and needle plate cover

The measurements on the bobbin cover are references for patterns with a middle (center) needle position. The measurements on the needle plate and the needle plate cover are references for stitches with a left needle position.

- For stitches with a middle (center) needle position
- For stitches with a left needle position
- Left needle position (inch)
- Middle (center) needle position on the bobbin cover (with markings) (inch)
- Left needle position on the needle plate cover (inch)

■ Operation buttons

1. “Start/Stop” button
   Press the “Start/Stop” button to start or stop sewing. The button changes color according to the machine’s operation mode.
   - Green: The machine is ready to sew or is sewing.
   - Red: The machine cannot sew.
   - Orange: The machine is winding the bobbin thread, or the bobbin winder shaft is moved to the right side.

2. Reverse/Reinforcement stitch button
   Press the reverse/reinforcement button to sew reverse/reinforcement stitches. (page 27)

3. Needle position button
   Press the needle position button to raise or lower the needle. Pressing the button twice sews one stitch.

4. Thread cutter button
   Press the thread cutter button after sewing is stopped to cut both the upper and the bobbin threads.

5. Sewing speed controller
   Slide the sewing speed controller to adjust the sewing speed. The sewing speed cannot be adjusted while sewing decorative stitches or embroidering.

■ Operation panel and operation keys

1. LCD (liquid crystal display) (touch panel)
   Selected pattern settings and messages are displayed. Touch the keys displayed on the LCD to perform operations. For details, refer to “LCD Operation” on page 10.

2. Previous page key
   Displays the previous screen when there are items that are not displayed on the LCD.

3. Next page key
   Displays the next screen when there are items that are not displayed on the LCD.

4. Help key
   Press to get help on using the machine.

5. Settings key
   Press to set the needle stop position, the buzzer sound, and more.

6. Embroidery key
   Press this key to embroider.

7. Utility stitch key
   Press this key to sew a utility stitch or decorative stitch.

8. Back key
   Press to return to the previous screen.

9. Presser foot/Needle exchange key
   Press this key before changing the needle, the presser foot, etc. This key locks all key and button functions to prevent operation of the machine.

Note
- The operation keys of this machine are capacitive touch sensors. Operate the keys by directly touching them with your finger. The response of the keys varies according to the user. The pressure exerted on the keys does not affect the response of the keys.

- Since the operation keys react differently depending on the user, adjust the setting for “Adjusting input sensitivity for operation keys” on page 13.

- When using an electrostatic touch pen, make sure that its point is 8 mm or more. Do not use a touch pen with a thin point or a unique shape.
Included accessories

After opening the carton, check that the following accessories are included. Part code for each item is listed under the part name.

Pull the top of the flat bed attachment to open the accessory compartment.

1. Zigzag foot "J" (on machine) XF9671-101
2. Monogramming foot "N" XD0810-031
3. Overcasting foot "G" XC3098-031
4. Zipper foot "I" X9370-021
5. Blind stitch foot "R" XE2650-001
6. Button fitting foot "M" XE2137-001
7. Buttonhole foot "A" XC2691-033
8. Embroidery foot "Q" XD0474-151
9. Needle set 75/11 2 needles, 90/14 2 needles, Ball point needle (gold colored) X58358-021
10. Twin needle 2/11 needle X59296-121
11. Bobbin (4) (One bobbin is on machine.) X52800-120
12. Embroidery bobbin thread (60 weight, white) BBT-W
13. Seam ripper XF4967-001
14. Scissors XC1807-121
15. Cleaning brush X59476-051
16. Eyelet punch XZ5051-001
17. Screwdriver XG237-021
18. Disc-shaped screwdriver XG1074-051
19. Extra spool pin XG3488-001
20. Spool cap (large) 130012-024
21. Spool cap (medium) on machine XE3720-001
22. Spool cap (small) 130013-124
23. Thread spool insert (mini king thread spool) XA5752-121
24. Bobbin case (on machine) XG7560-101
25. Spool net XA6523-020
26. Foot controller XG8816-071
27. Embroidery frame set (medium) 10 cm (H) × 10 cm (W) (4 inches (H) × 4 inches (W)) XG82
28. Accessory bag XG4487-021
29. Hard case XG8651-001
30. Power cord XG6052-121
31. Instruction and Reference Guide XG7951-001
32. Quick Reference Guide XG7962-001
33. Embroidery Design Guide XG7965-001
34. Bobbin cover XE8992-101
35. Extension table BLMVR-ET

Note
- (For U.S.A. only) Foot controller: Model T
  This foot controller can be used on the machine model: BLMVR. The model is mentioned on the machine rating plate.
- The presser foot holder screw is available through your authorized Baby Lock retailer. (Part code: XG1343-001)
Optional accessories

The following are available as optional accessories to be purchased separately.

Part name and part code for each item are listed in the following table.

</table>

* By changing the attaching position of the frame, 17 cm × 10 cm (6-7/10 inches × 4 inches) area can be embroidered without hooping the fabric again. The embroidery area is 10 cm × 10 cm (4 inches × 4 inches).

Memo

- To obtain optional accessories or parts, contact your authorized Baby Lock retailer.
- All specifications are correct at the time of printing. Please be aware that some specifications may change without notice.
- A variety of feet are available to enable different types of stitching and finishes. Visit your nearest authorized Baby Lock retailer for a complete listing of optional accessories available for your machine.
- Always use accessories recommended for this machine.
Turning the Machine On/Off

**WARNING**
- Use only regular household electricity for the power source. Using other power sources may result in fire, electric shock, or damage to the machine.
- Make sure that the plugs on the power cord are firmly inserted into the electrical outlet and the power cord receptacle on the machine. Otherwise, a fire or electric shock may result.
- Do not insert the plug on the power cord into an electrical outlet that is in poor condition.
- Turn the main power to OFF and remove the plug in the following circumstances:
  - When you are away from the machine
  - After using the machine
  - When the power fails during use
  - When the machine does not operate correctly due to a bad connection or a disconnection
  - During electrical storms

**CAUTION**
- Use only the power cord included with this machine.
- Do not use extension cords or multi-plug adapters with any other appliances plugged into them. Fire or electric shock may result.
- Do not touch the plug with wet hands. Electric shock may result.
- When unplugging the machine, always turn the main power to OFF first. Always grasp the plug to remove it from the electrical outlet. Pulling on the cord may damage the cord, or lead to fire or electric shock.
- Do not allow the power cord to be cut, damaged, modified, forcefully bent, pulled, twisted, or bundled. Do not place heavy objects on the cord. Do not subject the cord to heat. These things may damage the cord, or cause fire or electric shock. If the cord or plug is damaged, take the machine to your authorized Baby Lock retailer for repairs before continuing use.
- Unplug the power cord if the machine is not to be used for a long period of time. Otherwise, a fire may result.

1. Make sure that the machine is turned off (the main power switch is set to “OFF”), and then plug the power cord into the power supply jack on the right side of the machine.

2. Insert the plug of the power cord into a household electrical outlet.

3. Press the right side of the main power switch on the right side of the machine to turn the machine on (set it to “I”).

   → The light, LCD and the “Start/Stop” button light up when the machine is turned on. The needle and the feed dogs will make a sound when they move; this is not a malfunction.

4. When the machine is turned on, the opening movie is played. Press anywhere on the screen.

5. To turn off the machine, press the left side of the main power switch (set it to “OFF”).

*(For U.S.A. only)*
This appliance has a polarized plug (one blade wider than the other). To reduce the risk of electrical shock, this plug is intended to fit in a polarized electrical outlet only one way. If the plug does not fit fully in the electrical outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper electrical outlet. Do not modify the plug in any way.

Note
- When you first turn on the machine, select the language of your choice.

To turn off the machine, press the left side of the main power switch (set it to “OFF”).
LCD Operation

Viewing the LCD

Press a key with your finger to select the stitch pattern, to select a machine function, or to select an operation indicated on the key. The screen below appears when you press [ ] on the operation panel.

- Utility stitch screen
- Utility stitch editing screen
- Character/Decorative stitch screen
- Character/Decorative stitch editing screen

Note
- Some editing functions cannot be used with certain stitch patterns. Only the functions for the displayed keys are available when a stitch pattern is selected.

</tbody>
</table>
**Settings screen**

Press \( \text{OK} \) to change the default machine settings (needle stop position, opening display, etc.). Press \( \text{OK} \) or \( \text{OK} \), after you changed necessary settings.

**Memo**

- You can save the current settings screen image in a USB flash drive by pressing \( \text{OK} \) when the USB flash drive is inserted into the USB port. The files are saved in a folder labeled “bPocket”.

### Sewing settings

1. Select whether to use the sewing speed controller to determine the zigzag width. (page 49)
2. Make adjustments to character or decorative stitch patterns. (page 55)
3. Set to [ON] when using twin needle. (page 53)
4. Select either “1-01 Straight stitch (Left)” or “1-03 Straight stitch (Middle)” as the utility stitch that is automatically selected when the machine is turned on.

### Embroidery settings

5. Select the embroidery frame to be used.
6. Select the center mark and grid lines that are displayed.
7. When set to [ON], the embroidery pattern can be selected according to the embroidery frame size that you have selected in number 5. (page 64)
8. Change the thread color display on the “Embroidery” screen; thread number, color name. (page 67)
9. When the thread number [#123] is selected, select from thread brands. (page 67)
10. Change the display units (mm/inch).
11. Press to specify the size of pattern thumbnails.
12. Change the color of the background for the embroidery display area.
13. Change the color of the background for the thumbnail area.

### General settings

14. Select the needle stop position (the needle position for when the machine is not being operated) to be up or down.
15. Select whether to hear the beep operation sound.
16. Select whether to display the opening screen when the machine is turned on.
17. Select the display language.
18. Select whether to turn on the light for the needle area and work area.
19. Select the level of the input sensitivity for operation keys. (page 13)
20. Display the service count which is a reminder to take your machine in for regular servicing. (Contact your authorized Baby Lock retailer for details.)
21. The [No.] is the internal machine number for your machine.
22. Display the program version installed on your machine.
Adjusting input sensitivity for operation keys

You can adjust the sensitivity of the operation keys to 5 levels. Display the settings screen to set desired level.

1. Press \(\text{\#}1\) to display the settings screen.
2. Display page 7 by pressing \(\text{\#}2\).
3. Press [Start].

→ The adjusting screen is displayed.

4. Adjust the [Input Sensitivity] by pressing \(\text{\#}3\).
   - The higher the setting, the more sensitive the keys will be. The default setting is [3].
   - We recommend selecting the highest setting if an electrostatic touch pen is being used.
   - While adjusting the input sensitivity, press \(\text{\#}4\) to check whether the key responds. When the key responds, the setting value indicating the sensitivity blinks.

5. Press \(\text{\#}5\) to return to previous screen.

If the machine does not respond when an operation key is pressed

Turn machine off, then hold down \(\text{\#}6\) (Thread cutter button) and turn on the machine to reset [Input Sensitivity]. Display the settings screen, and then adjust the [Input Sensitivity] again.

---

Winding the bobbin

This section describes how to wind thread onto a bobbin.

1. Place the bobbin on the bobbin winder shaft so that the notch in the bobbin aligns with the spring on the shaft, and then slide the bobbin winder shaft to the right until it snaps into place.
   - The “Start/Stop” button lights up in orange.

2. Remove the spool cap and place the spool of thread for the bobbin onto the spool pin.
   - Slide the spool onto the spool pin so that the thread unwinds to the front from the bottom. Otherwise the thread may become tangled around the spool pin.

---

WARNING

- Only use the plastic bobbin that comes with this machine or bobbins of the same type (X52800-120). The bobbin's height is 11.5 mm (approx. 7/16 inch). Using other bobbins may cause damage to the machine. X52800-120 is Class 15 type bobbin.

Memo

- When winding the bobbin for sewing utility stitches, use thread appropriate for the fabric that you wish to sew (page 21). Normally, the thread will be the same as what is used for the upper threading.
- When winding bobbin for embroidery, be sure to use the recommended 60 weight embroidery bobbin thread for this machine.

---

Memo

- When winding the bobbin for sewing utility stitches, use thread appropriate for the fabric that you wish to sew (page 21). Normally, the thread will be the same as what is used for the upper threading.
- When winding bobbin for embroidery, be sure to use the recommended 60 weight embroidery bobbin thread for this machine.
Slide the spool cap onto the spool pin. Slide the spool cap as far as possible to the right, as shown, with the rounded side on the left.

**CAUTION**

- If the spool or the spool cap is not installed correctly, the thread may become tangled around the spool pin, causing the needle to break.
- Three spool cap sizes are available, allowing you to choose a spool cap that best fits the size of spool being used. If the spool cap is too small for the spool being used, the thread may catch on the slit in the spool or the machine may be damaged. When using mini king thread spool, use the thread spool insert (mini king thread spool). For details on thread spool insert (mini king thread spool), refer to “Memo” on page 14.

**Memo**

- When using the spool as shown below, use the small spool cap, and leave a small space between the cap and the spool.

![Diagram]

- When using thread that winds off quickly, such as transparent nylon thread or metallic thread, place the spool net over the spool before placing the spool of thread onto the spool pin. If the spool net is too long, fold it to fit the size of the spool.

![Diagram]

- If a spool of thread whose core is 12 mm (1/2 inch) in diameter and 75 mm (3 inches) high is inserted onto the spool pin, use the thread spool insert (mini king thread spool).

![Diagram]

4 Pass the thread under the thread guide, then under the thread guide cover and to the front.

![Diagram]
Winding/Installing the Bobbin

**GETTING READY**

1. Pass the thread under the hook on the bobbin winding thread guide, and then wind it counterclockwise under the pretension disk.

   ![Diagram](image1.png)
   - Bobbin winding thread guide
   - Pretension disk
   - Pull it in as far as possible

2. Wind the thread clockwise around the bobbin 5 or 6 times, pass the thread through the guide slit in the bobbin winder seat, and then pull the thread to cut it.

   ![Diagram](image2.png)
   - Guide slit in bobbin winder seat (with built-in cutter)

3. Note
   - Make sure that the thread is passed under the pretension disk.

4. Turn on the machine.

5. Press the “Start/Stop” button once to start winding the bobbin.

   ![Diagram](image3.png)
   - When the foot controller is plugged in, press down on the foot controller.

6. When the bobbin winding becomes slow, press the “Start/Stop” button once to stop the machine.

   ![Diagram](image4.png)
   - When the foot controller is plugged in, remove your foot from the foot controller.

7. Cut the thread, slide the bobbin winder shaft to the left until it snaps into place, and then remove the bobbin.

   ![Diagram](image5.png)
   - Slide the sewing speed controller to desired sewing speed position.

8. Remove the spool for the bobbin thread from the spool pin.

   ![Diagram](image6.png)
   - We recommend winding stretch thread, such as transparent nylon thread, at a low speed since the thread may stretch.

   **CAUTION**
   - Be sure to cut the thread as described. If the bobbin is wound without cutting the thread using the cutter built into the guide slit in the bobbin winder seat, the thread may become tangled in the bobbin or the needle may bend or break when the bobbin thread starts to run out.

   **Note**
   - When winding transparent nylon thread on the bobbin, stop bobbin winding when the bobbin is 1/2 to 2/3 full. If the bobbin was fully wound with transparent nylon thread, it may not be wound neatly, or sewing performance may suffer. In addition, extreme pressure may be applied to the bobbin, it may not be possible to remove the bobbin from the bobbin winder shaft, or the bobbin may break.

   **Memo**
   - When the bobbin winding becomes slow, stop the machine, otherwise the machine may be damaged.

   **CAUTION**
   - Be sure to wind the thread clockwise around the bobbin, otherwise the thread will become wrapped around the bobbin winder shaft.

   **Note**
   - When winding transparent nylon thread on the bobbin, stop bobbin winding when the bobbin is 1/2 to 2/3 full. If the bobbin was fully wound with transparent nylon thread, it may not be wound neatly, or sewing performance may suffer. In addition, extreme pressure may be applied to the bobbin, it may not be possible to remove the bobbin from the bobbin winder shaft, or the bobbin may break.

   **Memo**
   - We recommend winding stretch thread, such as transparent nylon thread, at a low speed since the thread may stretch.
Installing the bobbin

Install the bobbin wound with thread. You can begin sewing immediately without pulling up the bobbin thread by simply inserting the bobbin in the bobbin case and guiding the thread through the slit in the needle plate cover.

**Memo**
- If the threads will be pulled to create gathers or the thread at the beginning of sewing will be finished, for example, when free motion quilting, first pull up the bobbin thread. For details, refer to “Pulling up the bobbin thread” on page 20.

**CAUTION**
- Use a bobbin that has been correctly wound with thread, otherwise the needle may break or the thread tension will be incorrect.

- Before inserting or changing the bobbin, be sure to press on the operation panel to lock all keys and buttons, otherwise injuries may occur if the “Start/Stop” button or any other button is pressed and the machine starts.

1. Turn on the machine.
2. Press (Needle position button) once or twice to raise the needle.
3. Press .
   - The screen changes, and all keys and operation buttons are locked (except ).

4. Raise the presser foot lever.
5. Slide the bobbin cover latch to the right and remove the bobbin cover.
6. Insert the bobbin into the bobbin case so that the thread unwinds to the left.
7. Lightly hold down the bobbin with your right hand (1), and then guide the end of the thread around the tab of the needle plate cover with your left hand (2).

**Memo**
- By guiding the thread around the tab of the needle plate cover, passing the thread as shown by 2 in this illustration, then lightly pulling the thread at 3, the thread will enter the tension spring of the bobbin case to apply the appropriate tension to the bobbin thread during sewing.

**CAUTION**
- Be sure to hold down the bobbin with your finger and unwind the bobbin thread correctly, otherwise the thread may break or the thread tension will be incorrect.

8. While lightly holding down the bobbin with your right hand (1), guide the thread through the slit in the needle plate cover (2) and lightly pull it with your left hand (3).
While lightly holding down the bobbin with your right hand (1), continue guiding the thread through the slit with your left hand (2). Then, cut the thread with the cutter (3).

Reattach the bobbin cover.
Insert the tab of the bobbin cover into the notch of the needle plate cover, and then lightly press down on the right side.

Press \( \text{ to unlock all keys and buttons.} \)

Memo
• Be sure to complete the bobbin threading correctly according to these instructions. If the thread is simply placed in the slit in the needle plate cover, the bobbin thread will not be correctly threaded, resulting in poor sewing performance or incorrect thread tension.

Memo
• You can begin sewing without pulling up the bobbin thread. If you wish to pull up the bobbin thread before starting to sew, pull up the thread according to the procedure in “Pulling up the bobbin thread” on page 20.

CAUTION
• When threading the upper thread, carefully follow the instructions. If the upper threading is not correct, the thread may become tangled or the needle may bend or break.
• Never use a thread weight of 20 or lower.
• Use the needle and the thread in the correct combination. For details on the correct combination of needles and threads, refer to “Fabric/Thread/Needle Combinations” on page 21.

Threading the upper thread

Turn on the machine.

Raise the presser foot lever to raise the presser foot.

Note
• If the presser foot is not raised, the machine cannot be threaded.
Press (Needle position button) once or twice to raise the needle.

→ The needle is correctly raised when the mark on the handwheel is at the top, as shown below. Check the handwheel and, if this mark is not at this position, press (Needle position button) until it is.

Remove the spool cap and place the spool of thread onto the spool pin.

Slide the spool onto the spool pin so that the thread unwinds to the front from the bottom. Otherwise the thread may become tangled around the spool pin.

Slide the spool cap onto the spool pin.

Slide the spool cap as far as possible to the right, as shown, with the rounded side on the left.

Pass the thread under the thread guide, then under the thread guide cover and to the front.

Press .

→ The screen changes, and all keys and operation buttons are locked (except ).

CAUTION

• When threading the needle, be sure to press on the operation panel to lock all keys and buttons, otherwise injuries may occur if the “Start/Stop” button or any other button is pressed and the machine starts.

Pass the thread through the thread channel in the order shown below.

Make sure that the thread is passed into the thread take-up lever as shown below.

Slide the thread behind the needle bar thread guide.

The thread can easily be slid behind the needle bar thread guide by holding the thread in your left hand, then feeding the thread with your right hand, as shown. Make sure that the thread is passed through to the left of the tab of the needle bar thread guide.

CAUTION

• Choose a spool cap that best fits the size of spool being used. For more information regarding the choice of spool caps for your thread choice, refer to “Memo” on page 14.

• If the spool or the spool cap is not positioned correctly, the thread may become tangled around the spool pin or the needle may break.

• When threading the needle, be sure to press on the operation panel to lock all keys and buttons, otherwise injuries may occur if the “Start/Stop” button or any other button is pressed and the machine starts.
Check that the needle and thread are compatible with the needle threader. If they are compatible, continue with the next step.

- The needle threader can be used with machine needles 75/11 through 100/16.
- The needle threader cannot be used with the wing needle or the twin needle.
- When thread such as transparent nylon monofilament or specialty threads are used, it is not recommended to use the needle threader.
- If the needle threader cannot be used, insert the thread through the eye of the needle from front to back by hand. At this time, be sure to lock all keys and operation buttons described in step 7.

Pull the end of the thread, which has been passed through the needle bar thread guide, to the left, then pass the thread through the notch of the threader thread guide, and then firmly pull the thread from the front and insert it into the slit of the threader thread guide disk marked “7” all the way.

Cut the thread with the thread cutter on the left side of the machine.

Lower the presser foot lever to lower the presser foot.

Lower the needle threader lever on the left side of the machine as much as possible to make the hook turn.

Pull the end of the thread, which has been passed through the needle bar thread guide, to the left, then pass the thread through the notch of the threader thread guide, and then firmly pull the thread from the front and insert it into the slit of the threader thread guide disk marked “7” all the way.

Cut the thread with the thread cutter on the left side of the machine.

Note
- If the thread is pulled through and cannot be cut correctly, lower the presser foot lever so that the thread is held in place before cutting the thread. If this operation is performed, proceed to step 19.
- When using thread that quickly winds off the spool, such as metallic thread, it may be difficult to thread the needle if the thread is cut. Therefore, instead of using the thread cutter, pull out about 8 cm (approx. 3 inches) of thread after passing it through the threader thread guide disk (marked “7”).

Raise the presser foot lever slowly.

Carefully pull the end of thread that was passed through the eye of the needle.
If the needle was not completely threaded, but a loop in the thread was formed in the eye of the needle, carefully pull the loop through the eye of the needle to pull out the end of the thread.

Raise the presser foot lever, pass the end of the thread through and under the presser foot, and then pull out about 5 cm (approx. 2 inches) of thread toward the rear of the machine.

Press to unlock all keys and buttons.

Note
- If the needle is not raised to its highest position, the needle threader cannot thread the needle. Turn handwheel counterclockwise until the needle is at its highest position. The needle is correctly raised when the mark on the handwheel is at the top, as shown under step 3 on page 17.
Pulling up the bobbin thread

If the threads will be pulled to create gathers or the thread at the beginning of sewing will be finished, for example, when free motion quilting, first pull up the bobbin thread.

1. Refer to “Threading the upper thread” on page 17 to thread the machine with the upper thread and thread the needle.

2. Follow steps 1 to 2 “Installing the bobbin” on page 16 for installing the bobbin and to insert the bobbin into the bobbin case.

3. Pass the bobbin thread through the slot.
   Do not cut the thread with the cutter, otherwise it will be difficult to pull up the bobbin thread.

4. Press \( \text{ } \) to unlock all keys and buttons.

5. While lightly holding the upper thread with your left hand, press \( \text{ } \) (Needle position button) twice to lower and then raise the needle.

   → The bobbin thread is looped around the upper thread and can be pulled up.

6. Carefully pull the upper thread upward to pull out the end of the bobbin thread.

7. Pull up the bobbin thread, pass it under the presser foot and pull it about 10 cm (4 inches) toward the back of the machine, making it even with the upper thread.

8. Reattach the bobbin cover.
Fabric/Thread/Needle Combinations

- Needles that can be used with this machine: Home sewing machine needles (size 65/9 - 100/16)
  * The larger the number, the larger the needle. As the numbers decrease, the needles get finer.
- Thread that can be used with this machine: 30 - 90 weight
  * Never use thread of 20 weight or lower. It may cause machine to malfunction.
  * The smaller the number, the heavier the thread. As the numbers increase, the thread gets finer.
- The machine needle and thread that should be used depends on the type and thickness of the fabric. Refer to the following table when choosing the thread and needle appropriate for the fabric that you wish to sew.
  - The combinations shown in the table provide a general guideline. Be sure to sew trial stitches on the actual number of layers and type of fabric to be used in your project.
  - The machine needles are consumables. For safety and best results, we recommend replacing the needle regularly. For details on when to replace the needle, refer to “Checking the needle” on page 22.
- In principle, use a fine needle and thread with lightweight fabrics, and a larger needle and heavier thread with heavyweight fabrics.
- Select a stitch appropriate for the fabric, and then adjust the stitch length. When sewing lightweight fabrics, make the stitch length finer (shorter). When sewing heavyweight fabrics, make the stitch length coarser (longer). (page 29)
  When sewing stretch fabrics, refer to “Sewing stretch fabrics” on page 33.

</tbody>
</table>

- Transparent nylon thread
  Use a home sewing machine topstitching needle, regardless of the fabric or thread.
- Embroidery needles
  Use a 75/11 home sewing machine needle for embroidery.

**CAUTION**

- The appropriate fabric, thread and needle combinations are shown in the preceding table. If the combination of the fabric, thread and needle is not correct, particularly when sewing heavy fabrics (such as denim) with thin needles (such as 65/9 to 75/11), the needle may bend or break. In addition, the stitching may be uneven or puckered or there may be skipped stitches.
Replacing the Needle

**CAUTION**
- Only use recommended home sewing machine needles. Use of any other needle may bend the needle or damage the machine.
- Never use bent needles. Bent needles can easily break, possibly resulting in injuries.

### Checking the needle
Before using the needle, place the flat side of the needle on a flat surface and check that the distance between the needle and the flat surface is even.

- Flat side
- Needle type marking
- Flat surface
- Even
- Not even

**Note**
- Replace the needle in cases such as the four described below:
  1. If an unusual sound is produced when the needle enters the fabric while sewing trial stitches at low speed. (The tip of the needle may be broken or dull.)
  2. If stitches are skipped. (The needle may be bent.)
  3. Generally, after completing one project, such as a piece of clothing.
  4. Generally, after using three full bobbins of thread.

### Replacing the needle
Use the screwdriver and a new needle that has been determined to be straight according to the instructions in “Checking the needle” on page 22.

1. **Press** (Needle position button) once or twice to raise the needle.
2. Place fabric or paper under the presser foot to cover the hole in the needle plate to prevent the needle from falling into the machine.

3. **Press** . → The screen changes, and all keys and operation buttons are locked (except ).

4. Hold the needle with your left hand, and then use a screwdriver to turn the needle clamp screw toward you (counterclockwise) to remove the needle.

- Do not apply a strong force when loosening or tightening the needle clamp screw, otherwise certain parts of the machine may be damaged.

5. With the flat side of the needle toward the rear of the machine, insert the new needle until it touches the needle stopper. Using the screwdriver tighten the needle clamp screw by turning it clockwise.

6. **Press** to unlock all keys and buttons.

**CAUTION**
- Be sure to insert the needle until it touches the needle stopper and securely tighten the needle clamp screw with the screwdriver, otherwise the needle may break or damage may result.
Replacing the Presser Foot

**CAUTION**
- Use the appropriate presser foot for the type of stitch that you wish to sew, otherwise the needle may hit the presser foot, causing the needle to bend or break. For details on the presser foot that should be used with the selected stitch, refer to “Stitch Chart” on page 35.
- Only use presser feet designed specifically for this machine. Use of any other presser foot may result in injuries or damage to the machine.

**Note**
- When a stitch is selected, the icon for the presser foot that should be used appears in the screen. Check that the correct presser foot is attached before starting to sew. If the wrong presser foot is installed, attach the appropriate presser foot. (page 10)

---

1. **Replacing the presser foot**

   1. Press \(\text{ }\) (Needle position button) once or twice to raise the needle.

   2. Press \(\text{ }\).

      → The screen changes, and all keys and operation buttons are locked (except \(\text{ }\)).

---

**CAUTION**
- When replacing the presser foot, be sure to press \(\text{ }\) on the operation panel to lock all keys and buttons, otherwise injuries may occur if the “Start/Stop” button or any other button is pressed and the machine starts.

---

3. Raise the presser foot lever.

4. Press the black button at the back of the presser foot holder in order to remove the presser foot.

   - Black button
   - Presser foot holder

5. Place the appropriate presser foot below the presser foot holder so that the presser foot pin is aligned with the notch in the holder.

   - Presser foot holder
   - Notch
   - Pin
   - Presser foot type

6. Slowly lower the presser foot lever so that the presser foot pin snaps into the notch in the presser foot holder.

   - Presser foot lever
   - Presser foot holder
   - Notch
   - Pin

7. Raise the presser foot lever to check that the presser foot is securely attached.

8. Press \(\text{ }\) to unlock all keys and buttons.
Removing and attaching the presser foot holder

Remove the presser foot holder when cleaning the machine or when installing a presser foot that does not use the presser foot holder, such as the walking foot and quilting foot.

■ Removing the presser foot holder

1. Press ( ).
   → The screen changes, and all keys and operation buttons are locked (except ( )).

2. Remove the presser foot.
   • For details, refer to “Replacing the presser foot” on page 23.

3. Use the screwdriver to loosen the presser foot holder screw.
   Turn the screw toward the back of the machine (counterclockwise).
   • The presser foot holder screw can also be loosened or tightened with the disc-shaped screwdriver.

4. Press ( ) to unlock all keys and buttons.

■ Attaching the presser foot holder

1. Press ( )
   → The screen changes, and all keys and operation buttons are locked (except ( )).

2. Raise the presser foot lever.

3. Align the notch in the presser foot holder with the screw.

   ① Screw
   ② Notch in presser foot holder

4. Hold the presser foot holder in place with your right hand, and then tighten the screw using the screwdriver in your left hand.
   Turn the screw toward you (clockwise).

5. Press ( ) to unlock all keys and buttons.

CAUTION

• Be sure to securely tighten the presser foot holder screw, otherwise the presser foot holder may fall off and the needle may strike it, causing the needle to bend or break.
Chapter 2  SEWING BASICS

Sewing

**CAUTION**
- While the machine is in operation, pay special attention to the needle location. In addition, keep your hands away from all moving parts such as the needle and handwheel, otherwise injuries may occur.
- Do not pull or push the fabric too hard while sewing, otherwise injuries may occur or the needle may break.
- Never use bent needles. Bent needles can easily break, possibly resulting in injuries.
- Make sure that the needle does not strike basting pins, otherwise the needle may break or bend.

**Basic sewing**

1. Prepare the appropriate needle and thread for the type of fabric. (page 21)
   - If necessary, replace the needle. (page 22)
2. Wind thread onto a bobbin, and then install it into the machine. (page 13)
3. Thread the upper thread. (page 17)
4. Press **on the operation panel and select the stitch type.**
5. Select a stitch.
   - displays the previous screen, and displays the next screen.
   - For details on the key functions, refer to “Viewing the LCD” on page 10.
   - If necessary, change to the desired stitch width or stitch length. (page 29)
6. Check which presser foot is indicated in the upper-left corner of the screen, and then attach it.
   - Attach zigzag foot “J” in this procedure. (It is on the machine when purchased.)
   - For details on changing the presser foot, refer to “Replacing the Presser Foot” on page 23.

**Note**
- First, perform a trial sewing, using a piece of fabric and thread that are the same as those used for your project.

**Stitch types**

1. Utility stitches (page 35)
   - You can select from utility stitches, including straight line stitching, overcasting, buttonhole and basic decorative stitches.
2. Decorative stitches
3. Decorative satin stitches
4. Satin stitches
5. Cross stitch stitches
6. Utility decorative stitches
7. Character stitches
8. Stitch patterns stored in the machine’s memory (page 56)
9. Stitch patterns stored in USB flash drive (page 56)

**CAUTION**
- Always use the correct presser foot. If the wrong presser foot is used, the needle may strike the presser foot and bend or break, possibly resulting in injury.
- Refer to “Stitch Chart” on page 35 for presser foot recommendations.
Set the fabric under the presser foot. Hold the fabric and thread with your left hand, and rotate the handwheel counterclockwise or press \( \text{Needle position button} \) to set the needle in the sewing start position.

Lower the presser foot lever.

Adjust the sewing speed with the sewing speed controller. (when using utility stitches)

You can use this controller to adjust sewing speed during sewing.

Press the “Start/Stop” button to start sewing. (When the foot controller is plugged in, slowly press down on the foot controller.)

Guide the fabric lightly by hand.

Press the “Start/Stop” button again to stop sewing. (When the foot controller is plugged in, remove your foot from the foot controller.)

When the needle has stopped moving, raise the presser foot lever and remove the fabric.

Check the sewing finish. If necessary, adjust the thread tension. (page 29)

Using the foot controller

You can also use the foot controller to start and stop sewing.

Memo

- When the foot controller is being used, you cannot start sewing by pressing the “Start/Stop” button.

- When the foot controller is connected, you cannot use the “Start/Stop” button.
- Bobbin winding can be started and stopped with the foot controller.
- The foot controller cannot be used when embroidering.

Turn off the machine.

Insert the foot controller plug into the foot controller jack on the machine.

Turn on the machine.

**Sewing Basics**

1. Slowly depress the foot controller to start sewing.
2. Release the foot controller to stop the machine.

---

**Memo**

- The speed that is set using the sewing speed controller will be the foot controller's maximum sewing speed.

---

**Sewing reverse/reinforcement stitches**

Reverse/reinforcement stitches are generally necessary at the beginning and end of sewing. Depending on the selected stitch, reverse or reinforcement stitches are sewn while (Reverse/Reinforcement stitch button) is kept pressed. With reinforcement stitches, 3 to 5 stitches are sewn at the same place. With reverse stitches, the stitching is sewn in the opposite direction.

---

**Memo**

- When any of the following stitches is selected, pressing (Reverse/Reinforcement stitch button) will sew reverse stitches.

<table>
<thead>
<tr>
<th>No.</th>
<th>1-01</th>
<th>1-03</th>
<th>1-08</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stitch</td>
<td><img src="image1" alt="Reverse stitch" /></td>
<td><img src="image2" alt="Reinforcement stitch" /></td>
<td><img src="image3" alt="Reverse/Reinforcement stitch button" /></td>
</tr>
</tbody>
</table>

When any other stitch is selected, pressing (Reverse/Reinforcement stitch button) will sew reinforcement stitches.

---

**Combining Stitch Patterns**

Stitch patterns from the following categories can be combined.

1. Press .
2. Select the following stitch pattern.
3. Press .

   → The display returns to the stitch selection screen.
4. Press .
5. Select a font.
6. Press a tab to change the selection screens and enter a character.

---

**Memo**

- If a character is pressed by mistake, press . Characters are deleted individually starting with the last character entered.
- To enter a space, press .
If you want to sew the stitch pattern continuously, press \( \text{①} \) to display editing screen, and then press \( \text{②} \).

→ The stitch pattern turns continuous.

**Memo**
- When sewing is completed, trim any excess thread between characters.

### Automatic reverse/reinforcement stitching

After selecting a stitch pattern, turn on the automatic reverse/reinforcement stitching function before sewing, and the machine will automatically sew reinforcement stitches (or reverse stitches, depending on the stitch pattern) at the beginning and end of sewing.

1. **Select a stitch.**
   - For details on selecting a stitch, refer to “Basic sewing” on page 25.

2. **Press \( \text{①} \) to set the automatic reverse/reinforcement stitching function.**

   → The key will display as \( \text{①} \).

3. **Set the fabric in place and begin sewing.**

4. **Once you have reached the end of the stitching, press \( \text{①} \) (Reverse/Reinforcement stitch button).**

   \( \text{①} \) Reverse stitches (or reinforcement stitches)
   → The machine will sew reverse stitches (or reinforcement stitches) and stop.

### Automatically cutting the thread

The machine can be set to automatically cut the threads at the end of the stitching. This is called “programmed thread cutting”. If programmed thread cutting is set, automatic reverse/reinforcement stitching is also set.

If the machine is turned off, programmed thread cutting will be turned off.

1. **Turn on the machine.**

2. **Select a stitch.**
   - For details on selecting a stitch, refer to “Basic sewing” on page 25.

3. **Press \( \text{①} \) on the screen.**

   → You get \( \text{①} \), and the machine is set for programmed thread cutting and automatic reverse/reinforcement stitching.

   • To turn programmed thread cutting off, press \( \text{①} \).

4. **Set the fabric in place, and press the “Start/Stop” button once.**

   → Stitching will begin after reverse stitches (or reinforcement stitches) are sewn automatically.

5. **Once you have reached the end of the stitching, press \( \text{①} \) (Reverse/Reinforcement stitch button) once.**

   If stitching, such as buttonholes and bar tacking, that includes reinforcement stitching has been selected, this operation is unnecessary.

   → After the reverse stitching (or reinforcement stitching) has been done, the machine stops, and the threads are cut.

   ① The point where the “Start/Stop” button was pressed.
   ② The point where \( \text{①} \) (Reverse/Reinforcement stitch button) was pressed.
   ③ The threads are cut here.
Setting the stitch width/stitch length/“L/R Shift”

This machine is preset with the default settings for the stitch width, stitch length and “L/R Shift” for each stitch. However, you can change any of the settings by pressing in the utility stitch screen.

After changing the settings, press to return to the utility stitch screen.

If you wish to save specific settings for a stitch so that they can be used later, press after changing the settings to save the new settings with the selected stitch.

Memo
- Press to return the setting to its default. If is then pressed, the default settings are saved to the machine instead of the former settings.
- If the straight stitch or triple stretch stitch was selected, changing the stitch width changes the needle position. Increasing the width moves the needle to the right; reducing the width moves the needle to the left. (page 29)
- or means the setting cannot be changed.

CAUTION
- After adjusting the stitch width or the “L/R Shift”, slowly turn the handwheel toward you (counterclockwise) and check that the needle does not touch the presser foot. If the needle hits the presser foot, the needle may bend or break.
- If the stitches are bunched together, increase the stitch length. Continuing to sew with the stitches bunched together may result in the needle bending or breaking.

Setting the stitch width

The stitch width (zigzag width) can be adjusted to make the stitch wider or narrower.

Setting the stitch length

The stitch length can be adjusted to make the stitch coarser (longer) or finer (shorter).

Setting the “L/R Shift”

The placement of the zigzag stitch can be adjusted to move the stitch to the right or left.

Adjusting the thread tension

You may need to change the thread tension, depending on the fabric and thread being used.

Correct thread tension

The upper thread and the bobbin thread should cross near the center of the fabric. Only the upper thread should be visible from the right side of the fabric, and only the bobbin thread should be visible from the wrong side of the fabric.
■ Upper thread is too tight
If the bobbin thread is visible from the right side of the fabric, the upper thread is too tight. Loosen the thread tension.

Note
- If the bobbin thread was incorrectly threaded, the upper thread may be too tight. In this case, refer to “Installing the bobbin” on page 16 and rethread the bobbin thread.

Turn the thread tension dial counterclockwise to loosen the upper thread tension.

■ Upper thread is too loose
If the upper thread is visible from the wrong side of the fabric, the upper thread is too loose. Tighten the thread tension.

Note
- If the upper thread was incorrectly threaded, the upper thread may be too loose. In this case, refer to “Upper Threading” on page 17 and rethread the upper thread.

Turn the thread tension dial clockwise to tighten the upper thread tension.

 Useful Sewing Tips

■ Trial sewing
Before starting your sewing project, we recommend sewing trial stitches using thread and scrap fabric that are the same as those used for your project.

While checking the sewing results, adjust the thread tension as well as the stitch length and width according to the number of fabric layers and stitch that is sewn.

Note
- Other factors, such as fabric thickness, stabilizer material, etc., also have an effect on the stitch, so you should always sew a few trial stitches before beginning your project.
- When sewing decorative satin stitch or satin stitch patterns, there may be shrinking or bunching of stitches, so be sure to use a stabilizer material.

■ Changing the sewing direction

1. When the stitching reaches a corner, stop the machine.

   Leave the needle lowered (in the fabric). If the needle remains up when the machine stops sewing, press (Needle position button) to lower the needle.

2. Raise the presser foot lever, and then turn the fabric.

   Turn the fabric using the needle as a pivot.

3. Lower the presser foot lever and continue sewing.

■ Sewing curves

Sew slowly while slightly changing the sewing direction to sew around the curve. For details on sewing with an even seam allowance, refer to “Sewing an even seam allowance” on page 31.

When sewing along a curve while using a zigzag stitch, select a shorter stitch length in order to obtain a finer stitch.
■ Sewing cylindrical pieces
Removing the flat bed attachment allows for free-arm sewing, making it easier to sew cylindrical pieces such as sleeve cuffs and pant legs.

1 Pull the flat bed attachment off to the left.

2 Slide the part that you wish to sew onto the free arm, and then sew from the top.

3 When you are finished with free arm sewing, install the flat bed attachment back in its original position.

Sewing an even seam allowance
To sew an even seam, start sewing so that the seam allowance is to the right of the presser foot, and the edge of the fabric is aligned with either the right edge of the presser foot or a marking on the needle plate.

■ Changing the needle position
The needle position used as the baseline is different for the straight stitch (left needle position) and the straight stitch (middle (center) needle position).

When the stitch width of the straight stitch (left needle position) is set to its standard setting (0.0 mm), the distance from the needle position to the right side of the presser foot is 12 mm (1/2 inch). If the stitch width is changed (between 0 and 7.0 mm (1/4 inch)), the needle position will also change. By changing the stitch width and sewing with the right side of the presser foot aligned with the edge of the fabric, a seam allowance can be sewn with a fixed width.

- For details, refer to “Setting the stitch width” on page 29.

■ Aligning the fabric with a needle plate marking
The markings on the needle plate show the distance from the needle position of a seam sewn with the straight stitch (left needle position). Sew while keeping the edge of the fabric aligned with a marking on the needle plate. The distance between the markings in the upper scale is 1/8 inch (3 mm) and the distance between the markings in the grid is 5 mm (3/16 inch).

For stitches with a left needle position
(Stitch width: 0.0 mm)
Measurements on the bobbin cover (with markings)
The measurements on the bobbin cover are references for patterns with a middle (center) needle position.

1. For stitches with a middle (center) needle position
2. For stitches with a left needle position
3. Middle (center) needle position on the bobbin cover (with markings) <inch>

Aligning the fabric with zigzag foot “J”
The marking on zigzag foot “J” can be used to sew about 5 mm (3/16 inch) from the edge of the fabric. When using this feature, select a straight stitch, and set the stitch width to 2.0 mm.

Sewing Various Fabrics

- Sewing thick fabrics
  - If the fabric does not fit under the presser foot
    The presser foot lever can be raised to two different positions. If the fabric does not fit under the presser foot, for example, when sewing together thick fabrics, raise the presser foot lever to its highest position so that the fabric can be placed under the presser foot.

- If the fabric does not feed
  When sewing thick fabric such as denim or quilting, the fabric may not feed at the start of sewing if the presser foot is not level, as shown below. In this case, use the presser foot locking pin (black button on the left side) of zigzag foot “J” so that the presser foot remains level while sewing, allowing the fabric to be fed smoothly.
  If the presser foot misalignment is too large, place thick paper or fabric (with the same thickness as the fabric being sewn) under the heel of the presser foot to be able to start sewing smoothly.

1. Raise the presser foot lever.
2. Align the beginning of stitching, and then position the fabric.
3. While holding zigzag foot “J” level, push in and hold the presser foot locking pin (black button on the left side), and lower the presser foot lever.
4 Release the presser foot locking pin (black button).
   ➔ The presser foot remains level, allowing the fabric to be fed.

   ➔ After the seam is sewn, the presser foot will return to its original angle.

⚠ CAUTION
• If fabric more than 6 mm (15/64 inch) thick is sewn or if the fabric is pushed with too much force, the needle may bend or break.

■ Sewing thin fabrics
When sewing thin fabrics such as chiffon, the stitching may become misaligned or the fabric may not feed correctly. Move the needle (be sure to use a fine needle) to the furthest left or right hand position so that the fabric does not get pulled down into the feed dog area. If this occurs or there is shrinkage of the stitching, place non-woven water-soluble stabilizer under the fabric and sew them together.

   ① Water-soluble stabilizer (non-woven)

■ Sewing stretch fabrics
First, baste the pieces of fabric together, and then sew without stretching the fabric. If the stitching is misaligned, place non-woven water-soluble stabilizer under the fabric and sew them together.

   ① Basting

For best results when sewing on knit fabrics use the stretch stitches. Also be sure to use a needle for knits (Ball point needle (gold colored)). The recommended stitches and their stitch numbers are indicated below.

■ Sewing leathers or vinyl fabrics
When sewing fabrics that may stick to the presser foot, such as leather or vinyl fabrics, replace the presser foot with the walking foot*, non stick foot* or roller foot*.

* Items sold separately, please contact your authorized Baby Lock retailer.

① Leather

If the leather or vinyl fabric sticks to the flat bed attachment, sew with copy paper or tracing paper placed on top of the flat bed attachment so the fabric moves smoothly.

If the paper is positioned so that it does not cover the needle plate, the paper will not be sewn together with the fabric.

① Copy paper or tracing paper

‡ Note
• The walking foot can only be used with straight or zigzag stitch patterns. Do not sew reverse stitches with the walking foot.
• When sewing with the walking foot, sew at a speed between slow and medium.
• When using the walking foot, test sew on a scrap piece of leather or vinyl that is to be used in project to make sure foot does not leave any marks.
■ Sewing hook-and-loop fastener tape

⚠️ CAUTION

- Use only the adhesive-free hook-and-loop fastener tape which is designed for sewing. When the glue adheres to the needle or the bobbin case, it may cause malfunction.
- If the hook-and-loop fastener tape is sewn with the thin needle (65/9-75/11), the needle may bend or break.

 يوناه

- Before sewing, baste together the fabric and the hook-and-loop fastener tape.

Make sure that the needle passes through the hook-and-loop fastener tape by turning the handwheel and lower the needle into the hook-and-loop fastener tape before sewing. And then, sew the edge of the hook-and-loop fastener tape at a slow speed.

If the needle does not pass through the hook-and-loop fastener tape, replace the needle with the needle size for thicker fabrics. For details, refer to “Fabric/Thread/Needle Combinations” on page 21.

① Edge of the hook-and-loop fastener tape
## Stitch Chart

### Utility stitches

#### Memo
- The stitches shown in the tables and some of the illustrations may differ slightly from the stitch patterns displayed in the LCD.
- When any of the following stitches are selected, pressing (Reverse/Reinforcement stitch button) will sew reverse stitches.
- (Left needle position), (Middle (center) needle position), or (Right needle position) in some of the illustrations shows the needle position of the stitch.

### Various Stitches

#### Decorative stitches

Use monogramming foot “N”.

The twin needle can only be used with satin stitch [Ⅰ]. In addition, be sure to attach zigzag foot “J” when using the twin needle.

The twin needle cannot be used.

Use monogramming foot "N".
Utility stitches

CAUTION

Before replacing the presser foot, be sure to press \( \text{G} \) (Presser foot/Needle exchange key) on the operation panel to lock all keys and buttons, otherwise injuries may occur if the “Start/Stop” button or any other button is pressed and the machine starts. For details on changing the presser foot, refer to “Replacing the Presser Foot” on page 23.

Overcasting Stitches

Sew overcasting stitches along the edges of cut fabric to prevent them from fraying.

Using overcasting foot “G”

1. Attach overcasting foot “G”.

2. Select a stitch.

<table>
<thead>
<tr>
<th>No.</th>
<th>1-13</th>
<th>1-14</th>
<th>1-15</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stitch</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

- For details, refer to “Stitch Chart” on page 35.

CAUTION

When using overcasting foot “G”, be sure to select a stitch that can be used with overcasting foot “G”. If you sew with the incorrect stitch, the needle may hit the presser foot, bending the needle or damaging the presser foot.

3. Position the fabric with the edge of the fabric against the guide of the presser foot, and then lower the presser foot lever.
Rotate the handwheel toward you (counterclockwise). Check that the needle does not touch the presser foot.

1. The needle should not touch the center bar

Sew with the edge of the fabric against the presser foot guide.

1. Needle drop point

**CAUTION**

- Be sure to pull the fabric backward after finished sewing. If you pull the fabric toward side or forward, the presser foot pin may be damaged.
- If thread is tangled on the presser foot, remove the entangled thread, and then raise the presser foot lever to remove the presser foot. If the presser foot is raised while entangled with thread, the presser foot may be damaged.

Press the “Start/Stop” button to stop sewing when you are finished, and raise the presser foot and needle to pull the fabric under the presser foot towards the back of the machine.

**Using zigzag foot “J”**

1. Attach zigzag foot “J”.

2. Select a stitch.

<table>

<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

- For details, refer to “Stitch Chart” on page 35.

Sew along the edge of the fabric with the needle dropping off the edge at the right.

**Blind Hem Stitching**

Secure the lower edge of skirts and pants with a blind hem.

**Memo**

- When the size of cylindrical pieces is too small to slide onto the arm or the length is too short, the fabric will not feed and desired results may not be achieved.

1. Turn the skirt or pants inside out.

   1. Wrong side of fabric
   2. Right side of fabric
   3. Lower edge of fabric

2. Fold the lower edge of fabric to the desired length to be hemmed and then press.

   1. Wrong side of fabric
   2. Right side of fabric
   3. Lower edge of fabric
   4. Desired length for hem

3. Using tailor’s chalk, mark the fabric about 5 mm (3/16 inch) from the edge of the fabric, and then baste it.

   <Thick fabric>
   <Normal fabric>

   <Seen from the side>

4. Fold back the fabric inside along the basting.

   1. Wrong side of fabric
   2. Right side of fabric
   3. Lower edge of fabric
   4. Desired length for hem
   5. 5 mm (3/16 inch)
   6. Basting
   7. Basting point

   <Thick fabric>
   <Normal fabric>

   <Seen from the side>
5. Unfold the edge of fabric, and position the fabric with the wrong side facing up.

6. Attach blind stitch foot “R”.

7. Select a stitch.

<table>
<thead>
<tr>
<th>No.</th>
<th>2-01</th>
<th>2-02</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stitch</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

* For details, refer to “Stitch Chart” on page 35.

8. Remove the flat bed attachment to use the free arm.

9. Slide the item that you wish to sew onto the free arm, make sure that the fabric feeds correctly, and then start sewing.

10. Position the fabric with the edge of the folded hem against the guide of the presser foot, and then lower the presser foot lever.

11. Adjust the stitch width until the needle slightly catches the fold of the hem. (page 29)

12. Sew with the fold of the hem against the presser foot guide.

13. Press the “Start/Stop” button to stop sewing when you are finished, and raise the presser foot and needle to pull the fabric under the presser foot towards the back of the machine.

14. Remove the basting stitching and turn the fabric with the right side facing out.

**Memo**
- Blind hem stitches cannot be sewn if the left needle drop point does not catch the fold. If the needle catches too much of the fold, the fabric cannot be unfolded and the seam appearing on the right side of the fabric will be very large, leaving an unattractive finish.

**Note**
- Be sure to pull the fabric towards the back of the machine after sewing. If you pull the fabric toward side or forward, the presser foot may be damaged.
Utility stitches

Buttonhole sewing

The maximum buttonhole length is about 28 mm (1-1/8 inches) (diameter + thickness of the button).

Buttonholes are sewn from the front of the presser foot to the back, as shown below.

1. Use chalk to mark on the fabric the position and length of the buttonhole.

2. Pull out the button guide plate of buttonhole foot “A”, and then insert the button that will be put through the buttonhole.

3. If the button does not fit in the button guide plate

Add together the diameter and thickness of the button, and then set the button guide plate to the calculated length. (The distance between the markings on the presser foot scale is 5 mm (3/16 inch):)

Example: For a button with a diameter of 15 mm (9/16 inch) and a thickness of 10 mm (3/8 inch), the button guide plate should be set to 25 mm (1 inch) on the scale.

→ The size of the buttonhole is set.

4. Attach buttonhole foot “A”.

Position the upper thread under the presser foot by guiding thread through the hole in the presser foot before attaching the buttonhole foot “A”.

Note

Before sewing buttonholes, check the stitch length and width by sewing a trial buttonhole on a scrap piece of fabric used for your project.

</tbody>
</table>

• For details, refer to “Stitch Chart” on page 35.
Position the fabric with the front end of the buttonhole mark aligned with the red marks on the sides of the buttonhole foot, and then lower the presser foot lever.

- When lowering the presser foot, do not push in the front of the presser foot.

Pull down the buttonhole lever as far as possible.

Gently hold the end of the upper thread in your left hand, and then start sewing.

→ Once sewing is completed, the machine automatically sews reinforcement stitches, then stops.

Press \( \) (Thread cutter button) once. Raise the presser foot, and then remove the fabric.

Memo
- When using the thread cutter on the left side of the machine or scissors to cut the threads, press \( \) (Needle position button) to raise the needle, raise the presser foot, and then pull out the fabric before cutting the threads.

Raise the buttonhole lever to its original position.

Insert a pin along the inside of one bar tack at the end of the buttonhole stitching to prevent the stitching from being cut.

Use the seam ripper to cut towards the pin and open the buttonhole.

For keyhole buttonholes, use the eyelet punch to make a hole in the rounded end of the buttonhole, and then use the seam ripper to cut open the buttonhole.

- When using the eyelet punch, place thick paper or some other protective sheet under the fabric before punching the hole in the fabric.

CAUTION
- When opening the buttonhole with the seam ripper, do not place your hands in the cutting direction, otherwise injuries may result if the seam ripper slips.
- Do not use the seam ripper in any other way than how it is intended.
**Utility stitches**

**Sewing buttonholes on stretch fabrics**
When sewing buttonholes on stretch fabrics, use a gimp thread.

1. Hook the gimp thread onto the part of buttonhole foot “A” shown in the illustration.

2. It fits into the grooves, and then loosely tie it.

3. Attach buttonhole foot “A”.

4. Select a stitch.

<table>
<thead>
<tr>
<th>No.</th>
<th>4-05</th>
<th>4-06</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stitch</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

   - For details, refer to “Stitch Chart” on page 35.

5. Adjust the stitch width to the thickness of the gimp thread.

6. Lower the presser foot lever and the buttonhole lever, and then start sewing.

7. When sewing is finished, gently pull the gimp thread to remove any slack.

8. Use a handsewing needle to pull the gimp thread to the wrong side of the fabric, and then tie it.

---

**Button sewing**
Buttons can be sewn on with the machine. Buttons with two or with four holes can be attached.

1. Measure the distance between the holes in the button to be attached.

2. Raise the presser foot lever, and then slide the feed dog position switch, located at the rear of the machine on the base, to \[ \] (to the left as seen from the rear of the machine).

3. Attach button fitting foot “M”.

4. Select a stitch.

<table>
<thead>
<tr>
<th>No.</th>
<th>4-14</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stitch</td>
<td></td>
</tr>
</tbody>
</table>

   - For details, refer to “Stitch Chart” on page 35.

5. Adjust the stitch width so that it is the same as the distance between the holes in the button.

6. Place the button in the position where it will be sewn, and lower the presser foot lever.

   - When attaching four-hole buttons, first sew the two holes closest to you. Then, slide the button so that the needle goes into the two holes toward the rear of the machine, and then sew them in the same way.

7. Turn the handwheel toward you (counterclockwise) to check that the needle correctly goes into the two holes of the button.

   If it seems as if the needle will hit the button, remeasure the distance between the holes in the button. Adjust the stitch width to the distance between the buttonholes.
Start sewing.
Set the sewing speed controller to the left (so that the speed will be slow).

The machine automatically stops after sewing reinforcement stitches.

Do not press  (Thread cutter button).

Use scissors to cut the upper thread and the bobbin thread at the beginning of the stitching.
Pull the upper thread at the end of the stitching to the wrong side of the fabric, and then tie it with the bobbin thread.

When you are finished attaching the button, slide the feed dog position switch, to  (to the right as seen from the rear of the machine) and turn the handwheel to raise the feed dogs.

Memo
• The feed dogs come up when you start sewing again.

Zipper Insertion

Inserting a centered zipper
Stitching is sewn on both pieces of fabric butted against each other.

Attach zigzag foot “J”.

Sew straight stitches up to the zipper opening.
With the right sides of the fabric facing each other, sew reverse stitches after reaching the zipper opening.

Using a basting stitch, continue sewing to the edge of the fabric.

Press open the seam allowance from the wrong side of the fabric.

Align the seam with the center of the zipper, and then baste the zipper in place to the seam allowance.

Remove about 5 cm (2 inches) from the end of the basting on the outside.

Attach the presser foot holder to the right pin of zipper foot “I”.

CAUTION
• When sewing, be sure that the needle does not touch the button, otherwise the needle may bend or break.
Select a stitch.

<table>
<thead>
<tr>
<th>No.</th>
<th>Stitch</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-03</td>
<td></td>
</tr>
</tbody>
</table>

- For details, refer to “Stitch Chart” on page 35.

Topstitch around the zipper.

1. Stitching
2. Right side of fabric
3. Basting stitching
4. End of zipper opening

CAUTION
- When using zipper foot “I”, be sure to select the straight stitch (middle (center) needle position), and slowly turn the handwheel toward you (counterclockwise) to check that the needle does not touch the presser foot. If a different stitch is selected or the needle hits the presser foot, the needle may bend or break.

Memo
- If the presser foot contacts the zipper slider, leave the needle lowered (in the fabric) and raise the presser foot. After moving the slider so it will not contact the presser foot, lower the presser foot and continue sewing.

Remove the basting stitching.
Sew the two pieces of fabric together so the stitch pattern spans over both pieces.

Use pins if necessary.

**CAUTION**

- Do not stitch over pins.

**Piecing**

Sewing together two pieces of fabric is called “piecing”. The fabric pieces should be cut with a 6.5 mm (1/4 inch) seam allowance.

Sew a piecing straight stitch 6.5 mm (1/4 inch) from either the right side or the left side of the presser foot.

1. **Baste or pin along the seam allowance of the fabric that you wish to piece together.**
2. **Attach zigzag foot “J”.**
3. **Select a stitch.**

<table>
<thead>
<tr>
<th>No.</th>
<th>1-25</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stitch</td>
<td>p</td>
</tr>
</tbody>
</table>

- For details, refer to “Stitch Chart” on page 35.

4. **Sew with the side of the presser foot aligned with the edge of the fabric.**

- **For a seam allowance on the right side**
  Align the right side of the presser foot with the edge of the fabric, and sew using stitch 6.5 mm (1/4 inch).

- **For a seam allowance on the left side**
  Align the left side of the presser foot with the edge of the fabric, and set the stitch width 1.5 mm (1/16 inch) and sew using stitch 6.5 mm (1/4 inch).

**Memo**

- To change the width of the seam allowance (needle position), adjust the stitch width. For details, refer to “Setting the stitch width” on page 29 and “Sewing an even seam allowance” on page 31.

**Quilting**

Sandwiching batting between the top and bottom layers of fabric is called “quilting”. Quilts can easily be sewn using the walking foot* and the quilting guide*.

- Items sold separately, please contact your authorized Baby Lock retailer.

<table>
<thead>
<tr>
<th>Note</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thread the needle manually when using the walking foot, or attach the walking foot only after threading the needle using the needle threader.</td>
</tr>
<tr>
<td>When quilting, use a 90/14 home sewing machine needle.</td>
</tr>
<tr>
<td>The walking foot can only be used with straight or zigzag stitch patterns. Do not sew reverse stitches with the walking foot.</td>
</tr>
<tr>
<td>When sewing with the walking foot, sew at a speed between slow and medium.</td>
</tr>
<tr>
<td>When using the walking foot, test sew on a scrap piece of fabric that is to be used in project.</td>
</tr>
</tbody>
</table>

1. **Baste the fabric to be quilted.**
2. **Remove the presser foot and the presser foot holder.**
3. **Hook the connecting fork of the walking foot onto the needle clamp screw.**
4. **Lower the presser foot lever, and then tighten the presser foot holder screw with the screwdriver.**
1. Insert the stem of the quilting guide into the hole at the rear of the walking foot or presser foot holder.

2. Adjust the stem of the quilting guide so that the guide aligns with the seam that has already been sewn.

3. Slide the feed dog position switch, located at the rear of the machine on the base, to (to the left as seen from the rear of the machine).

The feed dogs are lowered.

4. Select a stitch.

5. For details, refer to “Stitch Chart” on page 35.

6. Place one hand on each side of the presser foot, and then evenly guide the fabric while sewing.

7. Using the quilting guide (sold separately)

Use the quilting guide to sew parallel stitches that are equally spaced.

8. Free motion quilting

We recommend attaching the foot controller and sewing at a consistent speed. You can adjust the sewing speed with the speed control slide on the machine.

9. CAUTION

- With free motion quilting, control the feeding speed of the fabric to match the sewing speed. If the fabric is moved faster than the sewing speed, the needle may break or other damage may result.

The free motion open toe quilting foot “O”* or quilting foot* is used for free motion quilting with zigzag or decorative stitches or for free motion quilting of straight lines on fabric with an uneven thickness.

* Items sold separately, please contact your authorized Baby Lock retailer.

- Select a stitch.

- For details, refer to “Stitch Chart” on page 35.

- Remove the presser foot holder.

- For details, refer to “Removing and attaching the presser foot holder” on page 24.
Attach the quilting foot by positioning the pin of the quilting foot above the needle clamp screw and aligning the lower-left of the quilting foot and the presser bar.

Hold the quilting foot in place with your right hand, and tighten the presser foot holder screw using the screwdriver with your left hand.

Use both hands to stretch the fabric taut, and then move the fabric at a consistent pace in order to sew uniform stitches roughly 2.0 mm - 2.5 mm (approx. 1/16 inch - 3/32 inch) in length.

After sewing is finished, slide the feed dog position switch lever to (to the right as seen from the rear of the machine) and turn the handwheel to raise the feed dogs.

**Satin stitching using the sewing speed controller**

A decorative stitch can be sewn by changing the stitch width of a satin stitch. If the machine is set so that the stitch width can be adjusted using the sewing speed controller, the stitch width can quickly and easily be adjusted.

1. Connect the foot controller.
2. Attach zigzag foot “J”.
3. Press  and set [Width Control] (page 1 of the settings screen) to [ON].

   → The machine is now set so that the stitch width can be controlled with the sewing speed controller.

4. Select a stitch.

<table>
<thead>
<tr>
<th>No.</th>
<th>1-28</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stitch</td>
<td>[ ]</td>
</tr>
</tbody>
</table>

   - For details, refer to “Stitch Chart” on page 35.

5. While sewing, slide the sewing speed controller to adjust the stitch width.

   - Adjust the sewing speed with the foot controller.

6. When you are finished sewing, set [Width Control] back to [OFF].

   • Make sure that the quilting foot is not slanted.

   **CAUTION**

   • Be sure to securely tighten the screws with the included screwdriver. Otherwise, the needle may touch the quilting foot, causing it to bend or break.

   Although the stitching results differ depending on the type of fabric being sewn and the thickness of the thread being used, for best results, adjust the stitch length to between 0.3 and 0.5 mm (1/64 and 1/32 inch).
Other Stitching Applications

■ Elastic attaching
When elastic tape is attached to the cuff or waist of a piece of clothing, the finished dimensions will be that of the stretched elastic tape. Therefore, it is necessary that a suitable length of the elastic tape be used.

1. Pin the elastic tape to the wrong side of the fabric.
   Pin the elastic tape to the fabric at a few points to make sure that the tape is uniformly positioned on the fabric.

2. Attach zigzag foot “J”.

3. Select a stitch.
   • For details, refer to “Stitch Chart” on page 35.

4. Sew the elastic tape to the fabric while stretching the tape so that it is the same length as the fabric.
   While pulling the fabric behind the presser foot with your left hand, pull the fabric at the pin nearest the front of the presser foot with your right hand.

CAUTION
   • When sewing, be sure that the needle does not touch any pins, otherwise the needle may bend or break.

■ Bar tack stitching
Bar tacks are used to reinforce points subject to strain, such as pocket corners and openings.
As an example, the procedure for sewing bar tacks at pocket corners is described below.

1. Determine the desired length of the bar tack.
   Set the button guide plate on buttonhole foot “A” to the desired length. (The distance between the markings on the presser foot scale is 5 mm (3/16 inch).)

   ![Presser foot scale](image)

   • A bar tack with a maximum length of about 28 mm (1–1/8 inches) can be sewn.

2. Attach buttonhole foot “A”.
   Position the upper thread under the presser foot by guiding thread through the hole in the presser foot before attaching the buttonhole foot “A”.

3. Select a stitch.
   • For details, refer to “Stitch Chart” on page 35.

4. Position the fabric so that the opening of the pocket faces toward you, and then lower the presser foot lever so that the needle drops 2 mm (1/16 inch) in front of the pocket opening.

5. Pull down the buttonhole lever as far as possible.

6. Gently hold the end of the upper thread in your left hand, and then start sewing.

7. After sewing is finished, raise the presser foot lever, remove the fabric, and then cut the threads.

8. Raise the buttonhole lever to its original position.
### Darning

1. **Determine the desired length of the darning.**
   Set the button guide plate on buttonhole foot “A” to the desired length. (The distance between the markings on the presser foot scale is 5 mm (3/16 inch).)

   - A bar tack with a maximum length of about 28 mm (1-1/8 inches) can be sewn.
   → Once sewing is completed, the machine automatically sews reinforcement stitches, then stops.

2. **Attach buttonhole foot “A”.**
   Position the upper thread under the presser foot by guiding thread through the hole in the presser foot before attaching the buttonhole foot “A”.

3. **Select a stitch.**
   - For details, refer to “Stitch Chart” on page 35.

4. **Position the fabric so that the needle is 2 mm (1/16 inch) in front of the area to be darned, and then lower the presser foot.**

   - For details, refer to “Stitch Chart” on page 35.

5. **Pull down the buttonhole lever as far as possible.**

6. **Gently hold the end of the upper thread in your left hand, and then start sewing.**

7. **After sewing is finished, raise the presser foot lever, remove the fabric, and then cut the threads.**

8. **Raise the buttonhole lever to its original position.**

### Eyelet Stitching

Eyelets, such as those on belts, can be sewn.

1. **Attach monogramming foot “N”.**

2. **Select a stitch.**
   - For details, refer to “Stitch Chart” on page 35.

3. **Adjust either the stitch width or the stitch length to select the desired eyelet size.**
   - For details, refer to “Setting the stitch width” and “Setting the stitch length” on page 29.

4. **Lower the needle into the fabric at the beginning of the stitching, and then lower the presser foot lever.**

5. **Start sewing.**
   → Once sewing is completed, the machine automatically sews reinforcement stitches, then stops.
After removing the fabric, use the eyelet punch to cut a hole in the center of the eyelet.

- When using the eyelet punch, place thick paper or some other protective sheet under the fabric before punching the hole in the fabric.

### Fagoting
Stitching across an open seam is called “fagoting”. It is used on blouses and children’s clothing. This stitch is more decorative when thicker thread is used.

1. Use an iron to fold the two pieces of fabric along their seams.
2. Baste the two pieces of fabric, separated by about 4 mm (3/16 inch), onto thin paper or a sheet of water-soluble stabilizer.

   If you draw a line down the middle of the thin paper or water-soluble stabilizer, sewing is easier.

   1. Thin paper or water-soluble stabilizer
   2. Basting stitching
   3. 4 mm (3/16 inch)

3. Attach zigzag foot “J”.
4. Select a stitch.

<table>

<td></td>
<td></td>
</tr>
</tbody>
</table>

   - For details, refer to “Stitch Chart” on page 35.

5. Set the stitch width to 7.0 mm (1/4 inch).
6. Sew with the center of the presser foot aligned along the center of the two pieces of fabric.
7. After sewing is finished, remove the paper.

### Scallop stitching
The wave-shaped repeated stitch pattern that looks like shells is called “scalloping”. It is used on the collars of blouses and to decorate the edges of projects.

1. Attach monogramming foot “N”.
2. Select a stitch.

<table>
<thead>
<tr>
<th>No.</th>
<th>2-06</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stitch</td>
<td></td>
</tr>
</tbody>
</table>

   - For details, refer to “Stitch Chart” on page 35.

3. Stitch along the edge of the fabric, making sure not to sew directly on the edge of the fabric.
4. Trim along the stitches.

- Be careful not to cut the stitches.

### Smocking
The decorative stitch created by stitching or embroidering over gathers is called “smocking”. It is used to decorate the front of blouses or cuffs.

The smocking stitch adds texture and elasticity to fabric.

1. Attach zigzag foot “J”.
2. Select the straight stitch, and then adjust the stitch length to 4.0 mm (3/16 inch) and loosen the thread tension.
3. Sew parallel stitching at intervals of 1 cm (3/8 inch) and pull the bobbin threads to create gathers.

   Smooth the gathers by ironing them.
4. Select a stitch.

<table>

Utility stitches

53

VARIOUS STITCHES

5 Stitch between the straight stitches and pull out the threads for the straight stitches.

- Shell tuck stitching
The gathers that look like shells are called “shell tucks”. They are used to decorate trims, the front of blouses or cuffs made of thin fabrics.

1 Draw equally spaced lines along the bias, and then fold the fabric along the lines.

2 Attach zigzag foot “J”.

3 Select a stitch, and then increase the thread tension.

<table>
<thead>
<tr>
<th>No.</th>
<th>Stitch</th>
</tr>
</thead>
<tbody>
<tr>
<td>2-05</td>
<td></td>
</tr>
</tbody>
</table>

- For details, refer to “Stitch Chart” on page 35.

4 Sew while making sure that the needle drops slightly off the edge of the fabric.

One fold at a time, continue folding the fabric along the line, then sewing it.

5 After sewing is finished, remove the fabric. Unfold the fabric, and then iron the tucks down to one side.

- Joining
Decorative bridging stitches can be sewn over the seam allowance of joined fabrics. This is used when making a crazy quilt.

1 Attach zigzag foot “J”.

2 Sew together the right sides of the two pieces of fabric, and then open up the seam allowances.

Select a stitch.

<table>
<thead>

</tbody>
</table>

- For details, refer to “Stitch Chart” on page 35.

4 Turn the fabric over so that the right side faces up, and then sew over the seam with the center of the presser foot aligned with the seam.

- Using the twin needle
With the twin needle, you can sew two parallel lines of the same stitch with two different threads. Both upper threads should have the same thickness and quality.

- CAUTION
- Only use the twin needle (2.0/11 needle, part code: X59296-121), and never use the needle threader with the twin needle. The needle may break or the machine may be damaged.

1 Press and install the twin needle.

2 Pass the first upper thread behind the needle bar thread guide.

- For details, refer to steps 1 through 10 of “Threading the upper thread” on page 17.

3 Manually thread the left needle with the first upper thread.

Pass the thread through the eye of the needle from the front.
Utility stitches

4 Put the extra spool pin in the hole on the top of the machine and put the spool of thread onto the extra spool pin.

5 Thread the machine with the second upper thread. Without passing the thread behind the needle bar thread guide, manually thread the right needle with the second upper thread.

6 Attach zigzag foot “J”.

7 Press \(\text{④}\) to unlock all keys and buttons.

8 Press \(\text{⑤}\) and set [Twin Needle] (page 1 of the settings screen) to [ON].

9 Select a stitch.

- For stitch selection refer to “Basic sewing” on page 25.
- Refer to “Stitch Chart” on page 35 for stitches that use a twin needle. You can also sew with a twin needle when you select a satin stitch pattern. In this case, use zigzag foot “J”.

10 Start sewing.

---

⚠️ CAUTION

- When using the twin needle, be sure to select an appropriate stitch, otherwise the needle may break or the machine may be damaged.

- When using the twin needle, be sure to select zigzag foot “J”. If bunched stitches occur, use monogramming foot “N” or attach stabilizer material.

- Do not try turning the fabric while the twin needle is down in the fabric, otherwise the needle may break or the machine may be damaged.

- When using the twin needle, be sure to select an appropriate stitch, otherwise the needle may break or the machine may be damaged.

- Do not try turning the fabric while the twin needle is down in the fabric, otherwise the needle may break or the machine may be damaged.

---

Heirloom stitching

When sewing with the wing needle, the needle holes are enlarged, creating a lace-like decorative stitch. This is used to decorate hems and tablecloths on thin or medium weight fabrics in addition to plain weave fabrics.

1 Install the wing needle.

2 Attach monogramming foot “N”.

3 Select a stitch.

<table>
<thead>
<tr>
<th>No.</th>
<th>3-02</th>
<th>3-04</th>
<th>3-06</th>
<th>3-10</th>
</tr>
</thead>
<tbody>
<tr>

<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

- For details, refer to “Stitch Chart” on page 35.

- Use a 130/705H 100/16 wing needle.
- For details on installing a needle, refer to “Replacing the needle” on page 22.
- The needle threader cannot be used with the wing needle, otherwise the machine may be damaged. Manually pass the thread through the eye of the needle from the front to the back.

- When sewing with the wing needle, select a stitch width of 6.0 mm (15/64 inch) or less, otherwise the needle may bend or break.
- After adjusting the stitch width, slowly turn the handwheel toward you (counterclockwise) and check that the needle does not touch the presser foot. If the needle hits the presser foot, the needle may bend or break.
Making adjustments

Your stitch pattern may sometimes turn out poorly, depending on the type or thickness of fabric, the stabilizer material used, sewing speed, etc. If your sewing does not turn out well, sew trial stitches using the same conditions as the real sewing, and adjust the stitch pattern as explained below. If the stitch pattern does not turn out well even after making adjustments based on the stitch pattern described below, make adjustments for each stitch pattern individually.

Memo
- This adjustment can be made to (1-30 Quilting stippling stitch), (4-15 eyelet stitch) and stitch patterns from the following categories.

Note
- Be sure to use monogramming foot “N”. Adjustments may not be made correctly with any other presser foot.

Press and select (5-31).

Attach monogramming foot “N” and sew the stitch pattern.

Press ( ), and then adjust the stitch pattern with the [Fine Adjust Verti.] display. (page 1 of the settings screen)

If the stitch pattern is bunched:
Press in the [Fine Adjust Verti.] display.
→ The displayed value increases each time the button is pressed and the stitch pattern will lengthen.

If the stitch pattern has gaps:
Press in the [Fine Adjust Verti.] display.
→ The displayed value decreases each time the button is pressed and the stitch pattern will shorten.

Sew the stitch pattern again.
- If the stitch pattern still comes out poorly, make adjustments again. Adjust until the stitch pattern comes out correctly.

Press to return to the original screen.

Using The Memory Function

Stitch data precautions
- Types of stitch data that can be used
  In the Character/Decorative Stitch memory, “.pmv”, “.pmx” and “.pmu” stitch data files can be used with this machine. “.pmu” or “.pmx” stitch data files can be retrieved; however, when the machine is used to save the file, it is saved as a “.pmv” stitch data file. Using data other than what was created using this machine or the machine which create “.pmv”, “.pmx” or “.pmu” data file, may cause the machine to malfunction.

USB flash drive
USB flash drive is commercially available, but some USB flash drives may not be usable with this machine. Please visit our website “www.babylock.com” for more details.

Precautions when using the computer to save data
- We recommend using the 26 letters of the alphabet (uppercase and lowercase), the numbers 0 through 9, “-”, and “_” for the name of the file/folder.
Using The Memory Function

Saving stitch patterns
You can save stitch patterns that you have customized in the machine’s memory or USB flash drive.

**Note**
- Do not turn the main power to OFF while the [Saving...] screen is displayed. You will lose the stitch pattern you are saving.

1. **Press** .

2. When saving the stitch pattern in a USB flash drive, insert the USB flash drive into the USB port on the machine.

3. **Press the desired destination to start saving.**

Retrieving stitch patterns
Retrieve stitch patterns saved in the machine's memory or USB flash drive.

1. When retrieving stitch patterns from a USB flash drive, insert the USB flash drive into the USB port on the machine.

2. **Press the desired destination.**

   - Retrieve from the machine’s memory.
   - Retrieve from a USB flash drive.

**Memo**
- If the stitch pattern to be retrieved is in a folder of the USB flash drive, press the key for that folder. Press to return to the previous screen.

- Folders in the USB flash drive cannot be created with the machine.

3. **Select the desired stitch pattern, and then press .**

   - Save to the machine’s memory.
   - Save to the USB flash drive.
   The stitch pattern is saved in a folder labeled “bPocket”.

**Note**
- When you press , the selected stitch pattern will be deleted permanently.
Embroidering Preparation

Follow the steps below to prepare the machine for embroidery.

</tbody>
</table>

CAUTION
- Be sure to use embroidery foot when doing embroidery. Using another presser foot may cause the needle to strike the presser foot, causing the needle to bend or break and possibly cause injury.

1. Press (Needle position button) to raise the needle.
2. Press . → The screen changes, and all keys and operation buttons are locked (except ).
3. Remove the presser foot and presser foot holder.
   - For details, refer to “Replacing the Presser Foot” on page 23.
4. Hold the embroidery foot “Q” with your right hand, as shown.
   Hold the embroidery foot with your index finger wrapped around the lever at the back of the foot.
While pressing in the lever on embroidery foot “Q” with your finger, fit the embroidery foot bar over the needle clamp screw.

Secure embroidery foot “Q” with the presser foot holder screw, making sure that embroidery foot “Q” is vertical.

Hold the embroidery foot in place with your right hand, and then use the included screwdriver to securely tighten the presser foot holder screw.

Press to unlock all keys and buttons.

Attaching the Embroidery Unit

CAUTION

- Before attaching the embroidery unit, be sure to turn off the machine. Otherwise, injuries may occur if one of the operation buttons is accidentally pressed and the machine starts embroidering.
- Do not move the machine with the embroidery unit in place. The embroidery unit may be dropped and cause injury.
- Keep your hands and other objects away from the embroidery carriage and frame when they are moving. Otherwise injury may result.

1 Turn off the machine.

2 Pull the flat bed attachment off to the left.

3 Insert the embroidery unit connector into the connection port, and then lightly push in the embroidery unit until it snaps into place.

CAUTION

- Use the included screwdriver to firmly tighten the screw of the embroidery foot. If the screw is loose, the needle may strike the presser foot and possibly cause injury.

Note

- Make sure that there is no gap between the embroidery unit and the machine, otherwise the embroidery pattern may not be embroidered correctly. Be sure to fully insert the connector into the connection port.
- Do not push on the carriage when attaching the embroidery unit to the machine, otherwise damage to the embroidery unit may result.
- Do not touch the connector in the embroidery unit connector slot. The connector could be damaged, and it may cause malfunctions.
- Do not lift up on the embroidery carriage, and do not forcefully move it. It may cause malfunctions.
4 Turn on the machine.
   → A message appears in the screen.

   **Note**
   - If [Opening Screen] is set [ON] within the settings screen, touch screen for the following message to appear.

5 Be sure that no objects or hands are near the embroidery unit and press OK.

   → The carriage moves to its initial position.
   → The screen for selecting the embroidery pattern type is displayed.

   **Memo**
   - Utility stitches cannot be selected when the embroidery unit is attached.

   **Removing the embroidery unit**
   Make sure that the machine is completely stopped and follow the instructions below.

1 Remove the embroidery frame.
   - For details on removing the embroidery frame, refer to “Removing the embroidery frame” on page 62.

2 Press Exclusives, and then press OK.

   → The embroidery carriage moves into a position where it can be stored.

3 Turn off the machine.

   **CAUTION**
   - Always turn off the machine before removing the embroidery unit.
   It may cause malfunctions if removed when the machine is turned on.

4 Hold the release button on the bottom left of the embroidery unit, and slowly pull the embroidery unit to the left.

---

**Embroidery Attractive Finishes**

There are many factors that go into beautiful embroidery. Using the appropriate stabilizer (page 60) and hooping the fabric in the frame (page 60) are two important factors mentioned earlier. Another important point is the appropriateness of the needle and thread being used. See the explanation of threads below.

### Thread

<table>
<thead>
<tr>
<th>Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Upper thread</td>
<td>Use embroidery thread intended for use with this machine. Other embroidery threads may not yield optimum results.</td>
</tr>
<tr>
<td>Bobbin thread</td>
<td>Use the recommended 60 weight embroidery bobbin thread (page 7, 8).</td>
</tr>
</tbody>
</table>
Hooping the fabric in the embroidery frame

⚠️ CAUTION

- Use fabrics with a thickness of less than 2 mm (1/16 inch). Using fabrics thicker than 2 mm (1/16 inch) may cause the needle to break.
- Always use a stabilizer material for embroidery when embroidering stretch fabrics, lightweight fabrics, fabrics with a coarse weave, or fabrics which cause pattern shrinkage. Otherwise, the needle may break and cause injury.

Attaching iron-on stabilizers (backing) to the fabric

For best results in your embroidery projects, always use stabilizer material for embroidery.

Press the iron-on stabilizer material to the wrong side of the fabric.

- Use a piece of stabilizer which is larger than the embroidery frame being used.

Memo

- When embroidering small pieces of fabric that cannot be hooped on an embroidery frame, use stabilizer material as a base. After lightly ironing the fabric to the stabilizer material, hoop it in the embroidery frame. If stabilizer material cannot be ironed onto the fabric, attach it with a basting stitch. After completing the embroidery, remove the stabilizer material carefully.

1. Fusible side of stabilizer
2. Fabric (wrong side)
3. Size of the embroidery frame

CAUTION

- If you use a frame that is too small, the presser foot may strike the frame during embroidering and cause injury or may damage your machine.

Note

- If the fabric is not securely held in the embroidery frame, the embroidery pattern will embroider out poorly. Insert the fabric on a level surface, and gently pull the fabric taut in the frame, being careful not to distort hooped fabric.
1. Loosen the embroidery frame adjustment screw and remove the inner and outer frames, placing the outer frame on a flat surface.
Separate the inner and outer frame by removing inner frame upward.

- Inner frame
- Outer frame
- Adjustment screw

2. Place the fabric with the stabilizer material on top of the outer frame.
Have the right side of the fabric facing up.

3. Press the inner frame in from the top of the fabric.
Line up △ on the inner frame and △ on outer frame.

4. Tighten the adjustment screw by hand just enough to secure the fabric.

5. Gently remove the fabric from the frame without loosening the adjustment screw.

Memo
- This precautionary step will help reduce pattern distortion while embroidering.

6. Press the inner frame in from the top of the fabric again, lining up △ on the inner frame and △ on outer frame.
- Press the inner frame into the outer frame.

7. Tighten the adjustment screw while removing any slack in the fabric by hand. The goal is to have a drum-like sound when the fabric is struck lightly.

Using the embroidery sheet
When you want to embroider the pattern in a particular place, use the embroidery sheet with the frame.

1. With a chalk pencil, mark the area of the fabric you want to embroider.

2. Place the embroidery sheet on the inner frame.

3. Line the mark on the fabric up with the base line on the embroidery sheet.

4. Place the inner frame with the fabric on the outer frame and adjust the fabric if needed to align marks on fabric with the embroidery sheet.
   - For details, refer to page 60.

5. Remove the embroidery sheet.
**Attaching the Embroidery Frame**

**Note**
- Wind and insert the bobbin before attaching the embroidery frame making sure to use the recommended bobbin thread. Check that there is enough thread in the bobbin.

1. Raise the presser foot lever to raise the presser foot.

2. Pass the embroidery frame under the presser foot.
   - If necessary, raise the presser foot lever even further.

3. Firmly insert the embroidery frame guide into the embroidery carriage frame holder from the top.
   Line up the embroidery frame guide tabs and the embroidery carriage frame holder slots and push in until it clicks and stops.

   - Embroidery frame guide tabs
   - Embroidery carriage frame holder slots
   → The embroidery unit is attached.

**Removing the embroidery frame**

- **Step 1** Raise the presser foot lever to raise the presser foot.

- **Step 2** Press the part of the embroidery frame holder in the figure to the left side, and raise the embroidery frame.

   → The embroidery frame will separate from the embroidery frame holder.

- **Step 3** Remove the embroidery frame under the presser foot while raising the presser foot lever even further.

**CAUTION**
- Correctly set the embroidery frame into the embroidery frame holder. Otherwise, the presser foot may hit the embroidery frame, resulting in injury.

- Do not hit the needle with your finger or the embroidery frame. It may cause injury or needle breakage.
Copyright information
The patterns stored in the machine are intended for private use only. Any public or commercial use of copyrighted patterns is an infringement of copyright law and is strictly prohibited.

Embroidery pattern types

- Baby Lock “Exclusives”
- Embroidery patterns
- Floral alphabet patterns
- Character patterns
- Frame patterns
- Press this key to position the embroidery unit for storage
- Patterns saved in the machine’s memory
- Patterns saved in USB flash drive

- Refer to the “Embroidery Design Guide” for more information on each category’s embroidery pattern.

Selecting an embroidery pattern

1. Press in the pattern type selection screen.

   - If the pattern type selection screen is not displayed, press to display the screen below.

2. Press or to display the desired pattern on the screen.

3. Select a desired embroidery pattern, and then press .

   - Available frame options are displayed on the screen.

4. Press .

   - For details on pattern editing screen, refer to “Editing Patterns” on page 71. You can move the pattern, change the size of pattern, and perform many other editing operations.

   - The pattern can also be moved by dragging it with your finger.

   → Embroidery settings screen appears.

5. Press .

   - For details on embroidery settings screen, refer to “Editing All Patterns” on page 73.

   - Confirm the pattern position to be embroidered, referring to “Checking the pattern position” on page 65.
Memo
• If [Embroidery Frame Identification View] in the settings screen is set to [ON], the pattern can be edited in the screen as if that embroidery frame is attached.

1 The embroidery frame selected when [Embroidery Frame Identification View] is set to [ON] is highlighted. Press this key to switch the setting between [ON] and [OFF].
2 The embroidering area for the selected frame is displayed.
3 Patterns that will not fit in the selected frame appear shaded and cannot be selected.

• There are three embroidering area sizes for embroidery frame (small). When [Embroidery Frame Identification View] is set to [ON] for embroidery frame (small), the area for arranging patterns can more easily be seen. The area outside of the embroidering area will have a different background color.

Selecting character patterns
1 Press A.
2 Press the key of the font you want to embroider.
3 Press a tab to display the desired selection screen, and then type in the text.

• To enter a space, press .

• After selecting a character if you would like to change the character size press . The size changes each time you press the key, from large to medium to small. After the character size is changed, all characters on the same line will have the new character size.

• If you make a mistake, press to erase the mistake.

• To check all entered characters, for example, when there are multiple text lines, press .

• To add multiple lines, press .

• When the Japanese font is selected, the text can be switched between being written vertically and horizontally by pressing .

Press .

• For details on editing the pattern, refer to “Editing Patterns” on page 71.

Selecting frame patterns
1 Press .
2 Press the key of the frame shape you want to embroidery.
3 Press the key of the frame pattern you want to embroidery.

Press .

• For details on editing the pattern, refer to “Editing Patterns” on page 71.

Combining Patterns
1 Select the pattern and then press .
2 Edit the pattern if needed, and then press .

• For details on pattern editing, refer to “Pattern editing screen” on page 71.
3 Press  to enter the alphabet characters. Select  and enter “Happy”.

4 Press to enter the alphabet characters. Select  and enter “Happy”.

5 Press .

6 Press  and then select .

7 Change the layout of the characters and then press  two times to return to the pattern editing screen.

8 Press  to change the color.

9 Change the color of the characters and then press  .

10 Edit the pattern position.
   • The pattern can be selected with your finger and then moved by dragging it. Use  to select patterns that are overlapping and cannot be selected by touching the screen.
   • Press  to decide the pattern position carefully.
   • Press  to check the preview of the combined patterns.

11 Press  .

Checking the pattern position
The embroidery frame moves and shows the pattern position. Watch the frame closely to make sure the pattern will be embroidered in the right place.

1 Press  on the embroidery settings screen.

2 From , press the key for the position that you want to check.

3 Press , and then press  .

Memo
• To see the entire embroidering area, press . The embroidery frame moves and shows the embroidery area.

CAUTION
• Make sure the needle is up when the embroidery frame is moving. If the needle is down, it could break and result in injury.
Embroidering a pattern

Embroidery patterns are embroidered with a change of thread after each color.

1. Prepare embroidery thread of the color shown on the screen.

![Embroidery Color Order]

Embroidery color order

- Either the thread color name or the thread number appears in this screen, depending on the setting selected in the settings screen. Press \( \text{⑤} \), and then change the setting in the settings screen. For details, refer to “Changing the thread color display” on page 67.

- The automatic thread cutting function will cut the thread at the end of embroidering each color. This function is initially turned on. To turn this function off, press \( \text{⑤} \).

2. Set the embroidery thread, and thread the needle.

- Refer to “Threading the upper thread” on page 17.

3. Raise the presser foot lever and pass the thread through the embroidery foot hole, and hold it lightly in your left hand.

Give the thread a little slack.

4. Lower the presser foot, then press the “Start/Stop” button to start embroidering.

After 5-6 stitches, press the “Start/Stop” button again to stop the machine.

5. Trim the excess thread at the end of the seam. If the end of the seam is under the presser foot, raise the presser foot, then trim the excess thread.

6. Press the “Start/Stop” button to start embroidering.

→ Stitching stops automatically with reinforcement after one color has been completed. When automatic thread cutting is set, the thread is cut.

7. Remove the thread for the first color from the machine.

8. Repeat the same steps for embroidering the remaining colors.

→ When the last color is embroidered, the message informing that the embroidering is finished will appear on the display. Press \( \text{⑤} \), and the display will return to the initial screen.

9. Cut the excess thread jumps within the color.

CAUTION

- Do not let hands or objects hit the carriage while embroidering. The pattern may misalign.
- When embroidering on large garments (especially jackets or other heavy fabrics), do not let the fabric hang over the table. Otherwise, the embroidery unit cannot move freely and the embroidery frame may strike the needle, causing the needle to bend or break and possibly cause injury. Place the fabric so that it does not hang off the table or hold the fabric to keep it from dragging.
Changing the thread color display
You can display the name of the thread colors or embroidery thread number.

Memo
• Colors on the screen may vary slightly from actual spool colors.

1 Press \( \text{ABC} \) and use \( \text{or} \) to display the following settings screen.

2 Use \( \text{or} \) of the \( \text{ABC} \) menu to select [Name of Color] or [#123] (thread number).

• When [Name of Color] is selected, the name of the thread colors is displayed.

• When [#123] is selected, the embroidery thread number is displayed. Use \( \text{or} \) of the [#123] menu to select the thread brand.

3 Press \( \text{OK} \).

If the thread breaks or the bobbin runs out of thread during embroidering

1 Press the “Start/Stop” button to stop the machine.

2 Press \( \text{ABC} \) and set the upper thread or bobbin thread.
• If the bobbin thread is almost empty, press \( \) (Thread cutter button) to cut the upper and bobbin threads, remove the embroidery frame, and then replace the bobbin with one wound with thread.

3 Press \( \text{OK} \).

4 Press \( \text{ABC} \), \( \text{ABC} \), or \( \text{ABC} \) to move the needle back the correct number of stitches before the area where the thread broke, and then press \( \text{OK} \).
• Press \( \text{ABC} \) to restart from the beginning.

5 Lower the presser foot and press the “Start/Stop” button to continue embroidering.

Resuming embroidery after turning off the power
The current color and stitch number are saved when embroidery is stopped. The next time the machine is turned on, you have the option to continue or delete the pattern.
Adjusting thread tension
The upper thread tension is changed using the thread tension dial.
When doing machine embroidery, the tension dial should be set somewhere between 2 to 6.

![Thread tension dial]

1. Loosen (Decrease the number)
2. Tighten (Increase the number)
3. Thread tension dial

 Memo
- If the stitches appear loose, turn the tension up one notch and embroider again.

 Correct thread tension
The thread tension is correct when upper thread is just visible on the wrong side (bottom) of the fabric.

![Thread tension correct]

1. Right side (top) of fabric
2. Wrong side (bottom) of fabric

 Upper thread is too tight
The bobbin thread will be visible on the right side (top) of the fabric. In this instance, decrease the upper thread tension.

![Thread tension loose]

1. Right side (top) of fabric
2. Wrong side (bottom) of fabric

 Upper thread is too loose
The upper thread has slack. In this instance, increase the upper thread tension.

![Thread tension tight]

1. Right side (top) of fabric
2. Wrong side (bottom) of fabric

 Note
- If the upper thread is not threaded correctly or the bobbin is not installed correctly, it may not be possible to set the correct thread tension. If the correct thread tension cannot be achieved, rethread the upper thread and insert the bobbin correctly.

Embroidering the appliqué patterns
When the color embroidery order display shows [APPLIQUE MATERIAL], [APPLIQUE POSITION] or [APPLIQUE], follow the procedure below.

![Embroidery order display]

Required materials
- Fabric for the appliqué piece
- Fabric for the appliqué base
- Stabilizer material
- Fabric glue or temporary spray adhesive
- Embroidering thread

 Note
- The correct names and numbers of the thread colors to be used will not appear. Select the thread colors depending on those in the appliqué pattern.

 1. Creating an appliqué piece

 Attach stabilizer material to the wrong side of the appliqué fabric.

 Sew the cutting line of the appliqué piece. Remove the fabric for the appliqué piece from the embroidery frame, and then carefully cut along the sewn cutting line.

 Outline of appliqué
Appliqué material

 Note
- If the appliqué piece is cut out along the inside of the cutting line, it may not be correctly attached to the fabric. Therefore, carefully cut out the appliqué piece along the cutting line.
- After cutting out the appliqué piece, carefully remove the thread.
**2. Sewing the appliqué position on the base fabric**

1. Sew the appliqué position.

2. Remove the embroidery frame from the embroidery unit.

**Note**
- Do not remove the base fabric from the embroidery frame until all sewing is finished.

**3. Affixing the appliqué piece to the base fabric**

1. Lightly apply fabric glue or temporary spray adhesive to the back of the appliqué piece, and then attach it to the base fabric within the outline of the position sewn in step a of “2. Sewing the appliqué position on the base fabric”.

2. After the appliqué piece is attached, attach the embroidery frame to the machine.

3. Finish embroidering the remainder of the pattern.

---

**Using a frame pattern to make an appliqué**

You can use framed patterns of the same size and shape to create an appliqué. Embroider one pattern with a straight stitch and one pattern with a satin stitch.

**Method 1**

1. Select a straight stitch frame pattern. Embroider the pattern onto the appliqué material, then cut neatly around the outside of the shape.

2. Embroider the same pattern from step 1 onto the base fabric.
   - Apply a thin layer of fabric glue or a temporary spray adhesive to the back of the appliqué created in step 1. Attach the appliqué to the base fabric matching the shapes.

3. Select the satin stitch frame pattern of the same shape as the appliqué. Embroider over the appliqué and base fabric from step 2 to create the appliqué.
Method 2

1. Select a straight stitch frame pattern, and embroider the pattern onto the base fabric.

2. Place the appliqué fabric over the pattern embroidered in step 1 and embroider the same pattern on the appliqué fabric.
   - Be sure that the appliqué fabric completely covers the stitched line.

3. Remove the embroidery frame from the embroidery unit, and cut around the outside of the stitches of the appliqué fabric. And then, reattach the embroidery frame to the embroidery unit.

4. Select the satin stitch frame pattern of the same shape as the appliqué and embroider the satin stitch pattern to create an appliqué.
   - Do not change the size or position of the pattern.

Split embroidery patterns

Split embroidery patterns created with Palette Ver.7 or later can be embroidered. With split embroidery patterns, embroidery designs larger than the embroidery hoop are divided into multiple sections, which combine to create a single pattern after each section is embroidered.

For details on creating split embroidery patterns and for more detailed embroidery instructions, refer to the Instruction manual included with Palette Ver.7 or later.

1. Insert the USB flash drive containing the created split embroidery pattern, and then select the split embroidery pattern to be embroidered.
   - For details, refer to “Retrieving embroidery patterns” on page 76.

2. Select section to be embroidered and press .
   - Select the sections in alphabetical order.

3. Press and press .

4. Press the “Start/Stop” button to embroider the pattern section.

5. When embroidering is finished, the following screen appears. Press .

   → A screen appears so that a section of the split embroidery pattern can be selected.

6. Repeat steps 2 through 5 to embroider the remaining sections of the pattern.

Note

- Do not remove the fabric from the embroidery frame to cut it. Also, do not pull or push on the fabric. Otherwise, the fabric may loosen in the frame.
Editing Patterns

When a pattern is selected in the pattern selection screen and is pressed, the pattern editing screen appears. After pressing any of the keys to edit the pattern, press to return to the previous screen. To finish all the editing, press to continue to the embroidery settings screen.

CAUTION
• When you have revised the pattern, check the display of available embroidery frames and use an appropriate frame. If you use an embroidery frame not displayed as available for use, the presser foot may strike the frame and possibly cause injury.

Pattern editing screen

Memo
• If a key display is light gray, you cannot use that function with the selected pattern.

<td>Starting point key</td>
<td>Press this key to move the needle start position to align the needle with the pattern position. (page 73)</td>
</tr>
</tbody>
</table>

### Aligning the pattern and the needle position

**Example: Aligning the lower left side of a pattern and the needle position**

1. Mark the embroidery start position on the fabric, as shown.

2. Press \( \text{Embroidery} \).

3. Press \( \text{ } \) and press \( \text{Ok} \).

4. Use \( \text{ } \) and \( \text{ } \) to align the needle and the mark on the fabric, press \( \text{ } \) and begin embroidering the pattern.
Embroidering linked characters

Follow the procedure described below to embroider linked characters in a single row when the entire pattern extends beyond the embroidery frame.

Example: Connecting “ABC” with “DEF”

1. Select the character patterns for “ABC”, and then press \( \text{and} \) \( \text{and} \).
2. Press \( \text{.} \)
3. Press \( \text{,} \) and then press \( \text{.} \)

→ The needle is positioned in the lower-left corner of the pattern. The embroidery frame moves so that the needle is positioned correctly.

4. Press \( \text{.} \)
5. Lower the embroidery foot and then press the “Start/Stop” button to begin embroidering.
6. After the characters are embroidered, and the threads are cut, remove the embroidery frame, and then press \( \text{for} \) [Finished embroidering].

7. Reposition the fabric in embroidery frame so that the right side of the letter “C” will be partially inside the embroidery frame; being careful so letters remain straight and level. Then reattach frame again so that the remaining characters (“DEF”) can be embroidered.

8. Press \( \text{to cancel the current character patterns.} \)
9. Select the character patterns for “DEF”, and then press \( \text{and} \) \( \text{and} \).
10. Press \( \text{.} \)
11. Press \( \text{,} \) and then press \( \text{.} \)

→ The needle is positioned in the lower-left corner of the pattern. The embroidery frame moves so that the needle is positioned correctly.

12. Use \( \text{to align the needle with the end of the embroidering for the previous pattern.} \)

13. Press \( \text{.} \)
14. Lower the embroidery foot and press the “Start/Stop” button to begin embroidering the remaining character patterns.
Using the Memory Function

Embroidery data precautions

CAUTION
- When using embroidery data other than our original patterns, the thread or needle may break when embroidering with a stitch density that is too dense or when embroidering three or more overlapping stitches. In that case, use one of our original data design systems to edit the embroidery data.

Types of embroidery data that can be used
Only .pes, .phc, and .dst embroidery data files can be used with this machine. Using data other than that saved using our data design systems or machines may cause the machine to malfunction.

Embroidery pattern size
This machine is compatible with embroidery patterns up to a maximum of 10 cm × 10 cm (4 inches × 4 inches).

USB flash drive
USB flash drive is commercially available, but some USB flash drives may not be usable with this machine. Please visit our website “ www.babylock.com ” for more details.

Precautions on using the computer to create and save data
We recommend using the 26 letters of the alphabet (uppercase and lowercase), the numbers 0 through 9, “-”, and “_” for the name of the file/folder.

Tajima (.dst) embroidery data
- .dst data is displayed in the pattern list screen by file name (the actual thumbnail image cannot be displayed).
- Since Tajima (.dst) data does not contain specific thread color information, it is displayed with our default thread color sequence. Check the preview and change the thread colors as desired.

Saving embroidery patterns

You can save embroidery patterns that you have customized in the machine’s memory or USB flash drive.

Note
- Do not turn the main power to OFF while the [Saving...] screen is displayed. You will lose the pattern you are saving.

1. Press \ when the pattern you want to save is in the pattern editing screen or embroidery settings screen.

2. When saving the embroidery pattern in a USB flash drive, insert the USB flash drive into the USB port on the machine.

3. Press the desired destination to start saving.

① Save to the machine’s memory.
② Save to the USB flash drive.
The pattern is saved in a folder labeled “bPocket”.

CAUTION
- When using embroidery data other than our original patterns, the thread or needle may break when embroidering with a stitch density that is too dense or when embroidering three or more overlapping stitches. In that case, use one of our original data design systems to edit the embroidery data.

Note
- Do not turn the main power to OFF while the [Saving...] screen is displayed. You will lose the pattern you are saving.

1. Press \ when the pattern you want to save is in the pattern editing screen or embroidery settings screen.

2. When saving the embroidery pattern in a USB flash drive, insert the USB flash drive into the USB port on the machine.

3. Press the desired destination to start saving.

① Save to the machine’s memory.
② Save to the USB flash drive.
The pattern is saved in a folder labeled “bPocket”.

Note
- Do not turn the main power to OFF while the [Saving...] screen is displayed. You will lose the pattern you are saving.
Using the Memory Function

Retrieving embroidery patterns

Retrieve embroidery patterns saved in the machine’s memory or USB flash drive.

1 When retrieving the embroidery patterns from a USB flash drive, insert the USB flash drive into the USB port on the machine.

2 Press the desired destination, and then select the desired embroidery pattern.

Memo
• If the embroidery pattern to be retrieved is in a folder of the USB flash drive, press the key for that folder. Press to return to the previous screen.

3 Press .

Memo
• When you press , the selected embroidery pattern will be deleted permanently.
• When retrieving the embroidery patterns from the machine’s memory, the selected pattern can be saved to USB flash drive directly by pressing .
• When retrieving the embroidery patterns from the USB flash drive, the selected pattern can be saved to the machine’s memory directly by pressing .
If the surface of the machine is dirty, lightly soak a cloth in neutral detergent, squeeze it out firmly, and then wipe the surface of the machine. After cleaning it once with a damp cloth, wipe it again with a dry cloth. If the screen is dirty, gently wipe it with a soft, dry cloth. Do not wipe the LCD screen with a damp cloth. Do not use organic solvents or detergents.

Restrictions on oiling

In order to prevent damaging this machine, it must not be oiled by the user.

This machine was manufactured with the necessary amount of oil applied to ensure correct operation, making periodic oiling unnecessary.

If problems occur, such as difficulty turning the handwheel or an unusual noise, immediately stop using the machine, and contact your authorized Baby Lock retailer.

Precautions on storing the machine

Do not store the machine in any of the locations described below, otherwise damage to the machine may result, for example, rust caused by condensation.

- Exposed to extremely high temperatures
- Exposed to extremely low temperatures
- Exposed to extreme temperature changes
- Exposed to high humidity or steam
- Near a flame, heater or air conditioner
- Outdoors or exposed to direct sunlight
- Exposed to extremely dusty or oily environments

Cleaning the race

Sewing performance will suffer if lint and dust collects in the bobbin case, therefore, it should be cleaned regularly.

1. Press (Needle position button) to raise the needle.
2. Turn off the machine.
3. Unplug the power cord from the power supply jack on the right side of the machine.
4. Raise the presser foot to remove the needle, presser foot and presser foot holder.
   - For details, refer to “Replacing the Needle” on page 22 and “Replacing the Presser Foot” on page 23.
5. Remove the flat bed attachment or the embroidery unit if either is attached.
6. Remove the needle plate cover.
7. Grasp both sides of the needle plate cover, and then slide it toward you.
8. Grasp the bobbin case, and then pull it out.
9. Use the cleaning brush or a vacuum cleaner to remove any lint and dust from the race and bobbin thread sensor and the surrounding area.

Cleaning brush
Race
Bobbin thread sensor
Do not apply oil to the bobbin case.

Note

- In order to extend the life of this machine, periodically turn it on and use it.
Storing this machine for an extended period of time without using it may reduce its efficiency.
Troubleshooting

1. **Insert the bobbin case so that the ▲ mark on the bobbin case aligns with the ● mark on the machine.**

![Diagram](image)

- Align the ▲ and ● marks.

2. **Lightly touch the center of each +, in order from 1 to 5.**

![Diagram](image)

3. **Turn the main power to OFF, then turn it back to ON.**

### Troubleshooting

If the machine stops operating correctly, check the following possible problems before requesting service. You can solve most problems by yourself or visit us at "www.babylock.com". If the problem persists, contact your Baby Lock retailer.

#### Frequent troubleshooting topics

Detailed causes and remedies for common troubleshooting topics are described below. Be sure to refer to this before contacting us.

</tr>
</tbody>
</table>

#### Upper thread tightened up

**Symptom**

- The upper thread appears as a single continuous line.
- The bobbin thread is visible from the right side of the fabric. (Refer to the illustration below.)
- The upper thread has tightened up, and comes out when pulled.
- The upper thread has tightened up, and wrinkles appear in the fabric.
- The upper thread tension is tight, and the results do not change even after the thread tension is adjusted.

![Diagram](image)

- Wrong side of fabric
- Bobbin thread visible from right side of fabric
- Upper thread
- Right side of fabric
- Bobbin thread
Cause
Incorrect bobbin threading
If the bobbin thread is incorrectly threaded, instead of the appropriate tension being applied to the bobbin thread, it is pulled through the fabric when the upper thread is pulled up. For this reason, the thread is visible from the right side of the fabric.

Remedy/check details
Correctly install the bobbin thread. (page 16)

Tangled thread on wrong side of fabric

Symptom
- The thread becomes tangled on the wrong side of the fabric.
- After starting sewing, a rattling noise is made and sewing cannot continue.
- Looking under the fabric, there is tangled thread in the bobbin case.

Cause
Incorrect upper threading
If the upper thread is incorrectly threaded, the upper thread passed through the fabric cannot be firmly pulled up and the upper thread becomes tangled in the bobbin case, causing a rattling noise.

Remedy/check details
Remove the tangled thread, and then correct the upper threading.

1. Remove the tangled thread. If it cannot be removed, cut the thread with scissors.
   - For details, refer to “Cleaning the race” on page 77.
2. Remove the upper thread from the machine.
3. Correct the upper threading by following the instructions in “Threading the upper thread” on page 17.
   - If the bobbin was removed from the bobbin case, refer to “Installing the bobbin” on page 16 to correctly install the bobbin.

Incorrect thread tension

Symptoms
- Symptom 1: The bobbin thread is visible from the right side of the fabric. (Refer to illustration below)
- Symptom 2: The upper thread appears as a straight line on the right side of the fabric.
- Symptom 3: The upper thread is visible from the wrong side of the fabric. (Refer to illustration below)
- Symptom 4: The bobbin thread appears as a straight line on the wrong side of the fabric.
- Symptom 5: The stitching on the wrong side of the fabric is loose or has slack.

1. Symptom 1
2. Symptom 3

Causes/remedy/check details

1. Cause 1
   The machine is not correctly threaded.
   <With symptoms 1 and 2 described above>
   The bobbin threading is incorrect. Return the thread tension dial to “4”, and then refer to “Upper thread tightened up” on page 78 to correct the threading.

   <With symptoms 3 and 5 described above>
   The upper threading is incorrect. Return the thread tension dial to “4”, and then refer to “Tangled thread on wrong side of fabric” on page 79 to correct the upper threading.
Troubleshooting

☐ Cause 2
A needle and thread appropriate for the fabric are not being used.
The machine needle that should be used depends on the type of fabric sewn and the thread thickness.
If a needle and thread appropriate for the fabric are not being used, the thread tension will not be adjusted correctly, causing wrinkles in the fabric or skipped stitches.
- Refer to “Fabric/Thread/Needle Combinations” on page 21 to check that a needle and thread appropriate for the fabric are being used.

☐ Cause 3
An appropriate upper tension is not selected.
Select an appropriate thread tension.
Refer to “Adjusting the thread tension” on page 29.
The appropriate thread tension differs depending on the type of fabric and thread being used.
* Adjust the thread tension while test sewing on a piece of scrap fabric that is the same as that used in your project.
- If the bobbin thread is visible from the right side of the fabric
  Turn the thread tension dial counterclockwise to loosen the upper thread tension.
- If the upper thread is visible from the wrong side of the fabric
  Turn the thread tension dial clockwise to tighten the upper thread tension.

Note
- If the upper threading and bobbin threading are incorrect, the thread tension cannot be adjusted correctly. Check the upper threading and bobbin threading first, and then adjust the thread tension.

Fabric is caught in the machine and cannot be removed
If the fabric is caught in the machine and cannot be removed, the thread may have become tangled under the needle plate. Follow the procedure described below to remove the fabric from the machine. If the operation cannot be completed according to this procedure, instead of attempting to remove it forcefully, contact your nearest authorized Baby Lock retailer.

■ Removing the fabric from the machine
1. Immediately stop the machine.
2. Turn off the machine.
3. Remove the needle.
   If the needle is lowered into the fabric, turn the handwheel away from you (clockwise) to raise the needle out of the fabric, and then remove the needle.
   - Refer to “Replacing the Needle” on page 22.
4. Remove the presser foot and presser foot holder.
   If the thread is entangled on the presser foot, remove the entangled thread, and then raise the presser foot lever to remove the presser foot. Otherwise, the presser foot may be damaged.
   - Refer to “Replacing the Presser Foot” on page 23.
5. Lift up the fabric and cut the threads below it.
   If the fabric can be removed, remove it. Continue with the following steps to clean the race.
6. Remove the needle plate cover.
   - Refer to “Cleaning the race” on page 77.
7. Cut out the tangled threads, and then remove the bobbin.
8. Remove the bobbin case.
   If threads remain in the bobbin case, remove them.
Use the cleaning brush or a vacuum cleaner mini attachment to remove any lint or dust from the race and its surrounding area.

Use the included disc-shaped screwdriver to loosen the two screws on the needle plate.

Slightly lift up the needle plate, cut any tangled threads, and then remove the needle plate.

If the fabric could be removed. Continue with step 18.
If the fabric could not be removed. Continue with step 10.

Note
• Compressed can air is not recommended to be used.

Use the included disc-shaped screwdriver to loosen the two screws on the needle plate.

Turn the handwheel to raise the feed dogs.

Align the two screw holes in the needle plate with the two holes at the needle plate mounting base, and then fit the needle plate onto the machine.

Lightly finger-tighten the screw on the right side of the needle plate. Then, use the disc-shaped screwdriver to firmly tighten the screw on the left side. Finally, firmly tighten the screw on the right side.

Remove any threads in the race and around the feed dogs.

Turn the handwheel to check that the feed dogs move smoothly and do not contact the edges of the slots in the needle plate.

Insert the bobbin case by following step j in “Cleaning the race” on page 77.

Attach the needle plate cover according to step k in “Cleaning the race” on page 77.

Check the condition of the needle, and then install it.

• Refer to “Checking the needle” on page 22 and “Replacing the needle” on page 22.

Memo
• Since the needle may have been damaged when the fabric was caught in the machine, we recommend replacing it with a new one.

Checking machine operations
If the needle plate has been removed, check machine operations to confirm that installation has been completed correctly.

Turn on the machine.

Select stitch .

Note
• Do not yet install the presser foot and thread.
3. Slowly turn the handwheel toward you (counterclockwise), and look from all sides to check that the needle falls at the center of the opening in the needle plate.

   If the needle contacts the needle plate, remove the needle plate, and then install it again, starting with step 16 in “Removing the fabric from the machine” on page 80.

4. Select stitch . At this time, increase the stitch length and width to their maximum settings.

   • For details on changing the settings, refer to “Setting the stitch width” on page 29 and “Setting the stitch length” on page 29.

5. Slowly turn the handwheel toward you (counterclockwise) and check that the needle bar and feed dogs operate correctly.

   If the needle or feed dogs contact the needle plate, the machine may be malfunctioning; therefore, contact your nearest authorized Baby Lock retailer.

6. Turn off the machine, and then install the bobbin and presser foot.

   Never use a scratched or damaged presser foot. Otherwise, the needle may break, or sewing performance may suffer.

   • Refer to “Installing the bobbin” on page 16 and “Replacing the presser foot” on page 23.

7. Correctly thread the machine.

   • For details on threading the machine, refer to “Upper Threading” on page 17.

   • Incorrect sewing may be the result of incorrect upper threading or sewing thin fabrics. If there are poor results from the trial sewing, check the upper threading or the type of fabric being used.

---

**If the thread becomes tangled under the bobbin winder seat**

If the bobbin winding starts when the thread is not passed under the pretension disk of the bobbin-winding thread guide correctly, the thread may become tangled under the bobbin winder seat.

---

**CAUTION**

- Do not remove the bobbin winder seat even if the thread become tangled under the bobbin winder seat. Otherwise, the cutter in the bobbin winder seat may be damaged.

- Do not remove the screw on the bobbin winder guide post, otherwise the machine may be damaged; you cannot wind off the thread by removing the screw.

---

1. Stop the bobbin winding.

2. Cut the thread with scissors beside the bobbin-winding thread guide.

3. Slide the bobbin winder shaft to the left, and then remove the bobbin from the shaft and cut the thread leading to the bobbin in order to be able to completely remove the bobbin from shaft.

4. Hold the thread end with your left hand, and wind off the thread clockwise from under the bobbin winder seat with your right hand as shown below.
### List of symptoms

Check the following possible problems before requesting service. If the reference page is ", contact your authorized Baby Lock retailer.

#### Getting ready

<table>
<thead>
<tr>
<th>Symptom, Cause/solution</th>

</tr>
<tr>
<td>9 No more patterns can be added to this combination.</td>
<td>This message is displayed when you tried to combine more than 70 decorative stitches.</td>
</tr>
<tr>
<td>10 Not enough available memory to save.</td>
<td>This message is displayed when the memory is full and the stitch or pattern cannot be saved.</td>
</tr>
<tr>
<td>11 Not enough available memory to save the pattern. Delete another pattern?</td>
<td>This message is displayed when the memory is full and the stitch or pattern cannot be saved. Press [ok], and delete a previously saved stitch or pattern to save the current one. Press [cancel] to return to the original screen without saving.</td>
</tr>
<tr>
<td>12 OK to recall and resume previous memory?</td>
<td>This message appears if the machine is turned off while embroidering, then turned on again. Press [ok] to return the machine to the condition (pattern position and number of stitches) when it was turned off. Follow the procedure described in “If the thread breaks or the bobbin runs out of thread during embroidering” on page 67 to align the needle position and embroider the remainder of the pattern.</td>
</tr>
<tr>
<td>13 Pattern extends to the outside of embroidery frame.</td>
<td>This message appears when the selected embroidery pattern is larger than the embroidery frame selected when [Embroidery Frame Identification View] is set to [ON].</td>
</tr>
<tr>
<td>14 Pattern extends to the outside of embroidery frame. Add no additional characters.</td>
<td>This message is displayed when the character pattern combination is too large to fit in the embroidery frame. Change the character pattern size or layout the patterns to fit the embroidery frame. If [Embroidery Frame Identification View] is set to [ON], setting to [OFF] or selecting larger frame may help.</td>
</tr>
<tr>
<td>15 Pattern extends to the outside of embroidery frame. This function cannot be used at this time.</td>
<td>This message appears when the embroidery character pattern is resized or switched between written vertically/horizontally so that it is too large for the embroidery frame.</td>
</tr>

## Troubleshooting

<table>
<thead>
<tr>
<th>Error messages</th>
<th>Cause/solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>16 Preventive maintenance is recommended.</td>
<td>Once this message appears, it is recommended to take your machine to an authorized Baby Lock retailer for a regular maintenance check. Although this message will disappear and the machine will continue to function once you press <code>[OK]</code>, the message will display several more times until the appropriate maintenance is performed.</td>
</tr>
<tr>
<td>17 Raise the buttonhole lever.</td>
<td>This message is displayed when the buttonhole lever is down, a stitch other than a buttonhole is selected, and the “Start/Stop” button, etc. is pressed.</td>
</tr>
<tr>
<td>18 The bobbin thread is almost empty.</td>
<td>This message is displayed when the bobbin thread is running out. Although a few stitches can be sewn when the “Start/Stop” button is pressed, replace with a wound bobbin immediately. When embroidering, press (Thread cutter button) to cut the threads, raise the presser foot, remove the embroidery frame, and then replace the bobbin with one wound with plenty of embroidery bobbin thread.</td>
</tr>
<tr>
<td>19 The bobbin winder safety device has activated. Is the thread tangled?</td>
<td>This message is displayed when the bobbin is being wound, and the motor locks because the thread is tangled, etc.</td>
</tr>
<tr>
<td>20 The carriage of the embroidery unit will move. Keep your hands etc. away from the carriage.</td>
<td>This message appears before embroidery unit moves.</td>
</tr>
<tr>
<td>21 The safety device has been activated. Is the thread tangled? Is the needle bent?</td>
<td>This message is displayed when the motor locks due to tangled thread or for other reasons related to thread delivery.</td>
</tr>
<tr>
<td>22 The “Start/Stop” button does not operate with the foot controller attached. Remove the foot controller.</td>
<td>This message is displayed when the “Start/Stop” button is pressed to sew Utility stitches or Character/Decorative stitches while the foot controller is connected.</td>
</tr>
<tr>
<td>23 This pattern cannot be used.</td>
<td>This message appears when you try to retrieve a pattern that cannot be used with this machine.</td>
</tr>
<tr>
<td>24 This USB media cannot be used.</td>
<td>This message is displayed when you try to use incompatible media.</td>
</tr>
<tr>
<td>25 USB media is not loaded. Load USB media.</td>
<td>This message is displayed when you try to recall or save a pattern while no USB flash drive is loaded.</td>
</tr>
<tr>
<td>26 When the speed controller is set to control the zigzag stitch width, the “Start/Stop” button does not operate.</td>
<td>This message is displayed when the speed control lever is set to control the zigzag stitch width, and the “Start/Stop” button is pressed. Set [Width Control] to [OFF] in the settings screen (page 12), or use the foot controller to operate the machine.</td>
</tr>
<tr>
<td>27 **</td>
<td>If error message [**] appears in the LCD while the machine is being used, the machine may be malfunctioning. Contact your authorized Baby Lock retailer.</td>
</tr>
</tbody>
</table>
### Operation beeps

If a correct operation is performed, the machine beeps one time.

If an incorrect operation is performed, the machine beeps two or four times.

If the machine locks up, for example, because the thread is tangled, the machine continues to beep for four seconds, and then the machine automatically stops. Be sure to check for the cause of the error, and correct it before continuing to sew.

### Upgrading your machine’s software

You can use USB flash drive to upgrade software for your machine.

When an upgrade program is available on our website at “www.babylock.com”, please download the file(s) following the instructions on the website and steps listed below.

1. **Turn on the machine while pressing and holding **4** (Needle position button).**

   → The following screen appears.

2. **Insert the USB flash drive into the USB port on the machine. The media device should only contain the upgrade file.**

3. **Press **Load**.**

   → When upgrading is finished, the completion message appears.

4. **Remove the USB flash drive, and turn the machine off and on again.**

### Note

- When using USB flash drive to upgrade the software, check that no data other than the upgrade file is saved on the USB flash drive being used before starting to upgrade.
