

## Baby Lock Palette 9 (Model ECS9) Software Update Version 9.30

September, 2013

### How to download the update program

1. Create a temporary folder (ex. C:\Temp) on your computer to save the update program file to be downloaded.
2. Download the file: **pal930eng.exe**.

### How to update your Palette 9 to Version 9.30

1. Double-click on the downloaded "**pal930eng.exe**" file.  
The update process will automatically start.
2. Follow the instructions and proceed through the update process.  
Once the update process finishes, Palette 9 will be updated to Version 9.30 and ready to use.

### --- Update History Detail ---

#### September, 2013      Update to Version 9.30

Only the affected applications of Palette 9 will show the version of this update.  
Current version of each application

Layout & Editing	9.3
Design Center	9.3
Programmable Stitch Creator	9.2
Design Database	9.3
Font Creator	9.3
Link	9.3

#### General

- Added the following hoop to the hoop size list in the Design Page Size Settings.  
\*45 mm x 24 mm / 1-3/4" x 7/8" (Clamp Frame)

### **Layout & Editing**

- Fixed the situation where the application may not work properly when creating an appliqué by using the Applique Wizard to convert the grouped embroidery pattern which includes a pattern with hole sewing.

## **Update to Version 9.23**

### **Layout & Editing**

- Fixed the situation where an embroidery file which includes text patterns created using TrueType fonts may not be opened correctly.

## **Update to Version 9.22**

### **Layout & Editing**

- Improved the quality of Net Fill Stitch.

## **Update to Version 9.21**

### **Layout & Editing**

- Fixed the situation where the region color button may be active though the Region sewing for the pattern was not set.

### **Design Database**

- Added **Classification** to the **Details** view in the contents pane.  
**Classification** column shows the marks for the following specific embroidery data.  
CW : Embroidery data for using cutwork function  
J : Embroidery data for using the jumbo frame

## **Update to Version 9.20**

### **General**

- Added the following hoop to the hoop size list in the Design Page Size Settings.  
150 x 150 (Quilting Hoop) for single needle machine
- Added the application program for creating cutwork patterns.  
**The cutwork function is available to purchasers of Cutwork Embroidery Upgrade for Multi-Needle Machines (Model BNCW)**  
**To upgrade your USB card writer module for the Cutwork function, refer to the installation guide included in the Cutwork Embroidery Upgrade for Multi-Needle Machines (Model BNCW).**

### **Layout & Editing**

- Added the **Reset Pane Position** button to the **Options** dialog box to set the undocked panes (**Color/ Sewing Attributes/ Text Attributes** pane, **Sewing Order** pane and **Stitch Simulator** pane) to its default position.

To set the panes to the default position, take the following steps.

1. To open the **Options** dialog box, click **Option** in the upper-right corner of the window, and then click **Options**.
  2. Select "**Application Color**", and then click **Reset Pane Position** button.
  3. The message "This setting will be applied after the application is restarted. Be sure to restart the application." appears. Click **OK** button in the message box.
  4. Then, restart Layout & Editing.
- Fixed the situation where some TrueType Fonts may not be converted correctly to embroidery patterns.
  - Fixed the situation where the same thread color may be applied to the adjoining regions with similar colors when using Auto Punch function.
  - Fixed the situation where an unexpected line may be created when drawing a curved line.
  - Minimum length for **Spacing** in the **Offset Line Settings**" dialog box is changed to 0.1 mm (0.01 inch).

### **Font Creator**

- Fixed the situation where some TrueType Fonts may not be converted correctly to embroidery patterns.

### **Design Database**

- Improved performance for displaying thumbnails of embroidery designs in the contents pane.

## **September, 2011      Update to Version 9.13**

### **Layout & Editing**

- Improved the response time to display the font list as it took a little longer time to display the font list in some computers.
- Fixed the situation where the direction of motif stitch pattern may not be correct when applying a motif stitch pattern to the outline of built-in font.
- Fixed the situation where the indication in the "Color pane" may not be correct when changing a setting of view of the color pane.
- Fixed the situation where the grid settings may change, when canceling the message dialog box for the data that has not been saved.
- Fixed the situation where "Image to Stitch" wizard may not work properly after editing user thread color lists.
- Fixed the situation where a pattern displayed in the realistic view may appear dark when opening a .pes file by double clicking on the file.

- Fixed the situation where a selected thread color in the "Color pane" may not be the same as the selected region.

### Design Database

- Fixed the situation where a file name may not be shown correctly in the Property dialog box.

## June, 2011      Update to Version 9.12

### Layout & Editing

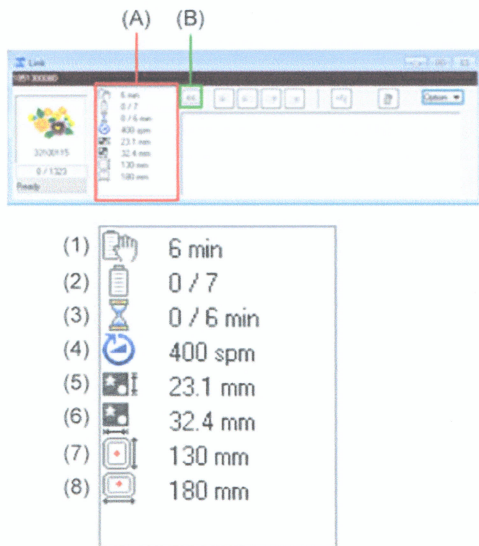

- "Snap to Grid" now works correctly when moving a selected point of object by using Up/Down cursor movement keys.
- Improved moving an object by using cursor movement keys.
- The Start up Wizard no longer appears when a design is imported to Layout & Editing from Design Database.
- Improved "Transform" to text.
- Improved the quality of some characters in the built-in font No.083.
- Improved moving an object several times.

## March, 2011      Update to Version 9.1

### Link

- The Link function has been improved to display more information from the embroidery machine.

You can refer to the information of embroidery from the connected embroidery machine in the information pane (A).

The information pane (A) can be displayed or hidden by clicking (B).

(1)	The amount of time until the machine will stop
(2)	The number of times the thread color has changed. / The total number of times the thread color will change.
(3)	The total amount of time that will have passed when the current thread color is finished, beginning from when sewing started. / The total amount of time required to sew the pattern.
(4)	The maximum sewing speed
(5)	The height of embroidery pattern size
(6)	The width of embroidery pattern size
(7)	The height of embroidery frame size
(8)	The width of embroidery frame size

**\*\*\* NOTE \*\*\***

The Link function can be used only with embroidery machines compatible with the Link function, such as BNT10 or BMP9.

It is necessary to update the software of your embroidery machine to the following version.

- BNT10: Version 1.10 or later.

- BMP9: Version 2.11 or later.

Make sure to update the software of your embroidery machine to the latest version. To update the software of your embroidery machine, visit the Downloads page for each model.

### **Layout & Editing**

- Fixed the situation where the .pes file may not be re-opened if the saved design has an object containing a stamp with embossed or engraved effects.
- Fixed the situation where the **Sewing Order** pane may not be displayed correctly when clicking the "Show by color order" icon.
- Fixed the situation where an embroidery pattern imported from Vector image (.wmf file) may not be scaled or rotated.
- Improved the quality of embroidery pattern imported from Vector image (.wmf file).
- Fixed the situation where the error message appears for previewing a print image depending on the customization of the "Quick Access Toolbar".
- Fixed the situation where the error message may appear when selecting the TrueType Font depending on its file name.
- Fixed the situation where the marching lines around the selected object may not be displayed correctly when clicking the "Zoom" icon or "Show by color order" icon in the **Sewing Order** pane.

### **Design Center**

- Fixed the situation where the sewing attribute about "Step Pitch" of "Base Sewing" in Region sewing attributes may not be applied to the region of "Programmable fill stitch".
- Reduced the flicker of the screen at the **Stage 4**.
- Fixed the situation where the .pem file saved by previous version of Palette may not be opened.

## **September, 2010      Update to Version 9.02**

### **Layout & Editing**

- Fixed the situation where a .pes file may not be saved correctly when saving a design with a file type of a previous version.

## **August, 2010      Update to Version 9.01**

### **Layout & Editing**

- Added 200 template patterns for using the **Template Wizard**.
- Added some Turkish characters in the following built-in fonts.  
(Built-in Font No.030, 031, 032, 033, 034 and 035.)
- Improved the conversion speed in the **Photo Stitch 1 Wizard**.
- Fixed the situation where a design page can not be printed correctly when printing an embroidery design as a realistic image.
- Improved the conversion quality when converting a .wmf file to an embroidery pattern with the **Import from Vector Image** command.
