

FOR THE LOVE OF SEWING

ProStitcher Premium

Software Update Version 19.04.0501

We are continually making improvements to ProStitcher software.

Changes addressed in this release are as follows:

- Opti-Stitch™ is a feature which automatically calculates speed and acceleration to match the quilter's chosen design and responds with optimal stitch performance. Pro-Stitcher Premium will smoothly slow down and speed up in and out of corners. Designs will be executed with improved accuracy, even with the most intricate patterns.
- Manual control of speed and acceleration are available within the program so quilters can modify performance if necessary
- Baste stitch button
- Motors not locked at end of pattern (can change in settings)
- Design Points view
- Simulation license is no longer required
- Some user interface icons have been updated
- Functional tack stitch
