

Baby Lock Solaris (Model BLSA) Tutorial videos update version 3.04

September 2020

Introduction

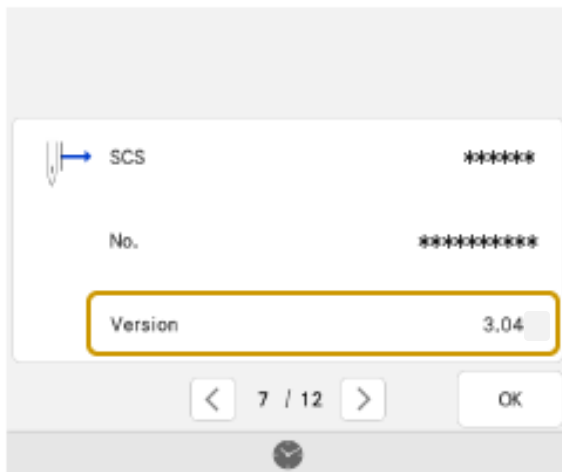

This software will update the built-in tutorial videos on your Solaris (Model BLSA).

How to confirm whether the tutorial videos is latest on your BLSA

1. Press the power switch to "|" to turn on your machine.
2. If the opening movie is played, touch anywhere on the LCD screen.
3. Press  (Machine setting screen key) to display the machine's settings screen.

4. The machine's settings screen appears.
5. Switch the settings screens by using  (Previous page key) or  (Next page key) to display the machine's program version.
6. Check the version shown on the display as described below.

- If the version number is displayed as **3.04**, it is necessary to update the tutorial video data on your machine. Follow the instructions below to update the video data.

- If "**Version**" is lower than "**3.04**", update your machine's software with the Version 3.04 update file first, before installing the Version 3.04 video update file.

How to update your machine's software

- You can use a USB Flash drive to update the video data on your machine.

* * * NOTE * * *

- Do not turn off your machine while the machine is saving the update software to itself. If the machine's power is turned off while saving the update software, it may result in damage to the machine.
- Use a 4GB or larger USB flash drive when updating the machine.
- Check that no data except for the update file is saved on the formatted USB Flash drive, before beginning update.

How to update your machine's software using a USB Flash drive

1. Insert the USB Flash drive into the USB port on the computer.
2. Copy only the update file, Mov2_t.upf, to the USB Flash drive.
3. Safely remove the USB Flash drive from the USB port on the computer.
4. While pressing the "Automatic Threading" button, turn the main power to ON.
